DVR-5100H-S

ORDER NO.  
**RRV2861**

DVD RECORDER

# DVR-5100H-S

THIS MANUAL IS APPLICABLE TO THE FOLLOWING MODEL(S) AND TYPE(S).

Model	Type	Power Requirement	Region No.	Serial No. Confirm 3rd & 4th alphabetical letters.
DVR-5100H-S	WY	AC220-240V	2	&&TT#####
DVR-5100H-S	WYXU	AC220-240V	2	&&PG#####
DVR-5100H-S	WVXU	AC220-240V	2	&&PG#####

- When servicing this model, some service procedures may reset the settings that customer set (\*) to the factory default settings. Make sure to explain this to the customer.

(\*) : Initial Setup (Clock Setting, Remote Control Set, Channel settings, Video Out settings, Audio In settings, Audio Out settings, Language settings)

Refer to the chapter 13 of the Operating Instructions for more details.

An HDD (Hard Disc Drive) is mounted in this product.

The HDD is a precision instrument very vulnerable to shock and electrostatic charges.

Please read "7.6 Cautions on Handling the HDD" in this manual and exercise sufficient caution when handling the HDD itself, as well as the product with the HDD built in.

When an HDD becomes defective and inoperable, restoration of the user's data recorded on the HDD, or copying of the user's recorded data to other media (such as a new HDD) is totally impossible. Before servicing, OBTAIN THE USER'S PRIOR CONSENT to that effect.

The user must be made aware that all recorded data are deleted if the HDD is initialized.

2. When the cover is opened, close viewing of the objective lens with the naked eye will cause exposure to a Class 3A laser beam.

**[ Important symbols for good services ]**

In this manual, the symbols shown below indicate that adjustments, settings or cleaning should be made securely. When you find the procedures bearing any of the symbols, be sure to fulfill them:

**1. Product safety**

You should conform to the regulations governing the product (safety, radio and noise, and other regulations), and should keep the safety during servicing by following the safety instructions described in this manual.

**2. Adjustments**

To keep the original performances of the product, optimum adjustments or specification confirmation is indispensable. In accordance with the procedures or instructions described in this manual, adjustments should be performed.

**3. Cleaning**

For optical pickups, tape-deck heads, lenses and mirrors used in projection monitors, and other parts requiring cleaning, proper cleaning should be performed to restore their performances.

**4. Shipping mode and shipping screws**

To protect the product from damages or failures that may be caused during transit, the shipping mode should be set or the shipping screws should be installed before shipping out in accordance with this manual, if necessary.

**5. Lubricants, glues, and replacement parts**

Appropriately applying grease or glue can maintain the product performances. But improper lubrication or applying glue may lead to failures or troubles in the product. By following the instructions in this manual, be sure to apply the prescribed grease or glue to proper portions by the appropriate amount. For replacement parts or tools, the prescribed ones should be used.

# 1. SPECIFICATIONS

## Specifications

### General

System.....HDD, DVD-Video, DVD-R/RW,  
Video-CD, CD, CD-R/RW (WMA, MP3, JPEG, CD-DA)  
Power requirements.....220-240 V, 50/60 Hz  
Power consumption.....48 W  
Power consumption in standby mode.....0.7 W  
(FL off)  
Weight.....5.1 kg  
Dimensions.....420 (W) x 69 (H) x 341 (D) mm  
Operating temperature.....+5°C to +35°C  
Operating humidity.....5% to 85%  
(no condensation)  
TV system.....PAL/SECAM/  
NTSC (external input only)

### Recording

Recording format.....DVD Video Recording  
DVD-VIDEO

### Recordable discs

DVD-RW (DVD Re-recordable disc)  
DVD-R (DVD Recordable disc)

### Video recording format

Sampling frequency.....13.5MHz  
Compression format.....MPEG

### Audio recording format

Sampling frequency.....48kHz  
Compression format.....Dolby Digital or Linear PCM  
(uncompressed)

### Recording time

#### HDD

Fine (FINE).....Approx. 17 hours  
Standard Play (SP).....Approx. 34 hours  
Long Play (LP).....Approx. 68 hours  
Extended Play (EP).....Approx. 102 hours  
Manual Mode (MN).....Approx. 17-102 hours

#### DVD-R/DVD-RW

Fine (FINE).....Approx. 1 hour  
Standard Play (SP).....Approx. 2 hours  
Long Play (LP).....Approx. 4 hours  
Extended Play (EP).....Approx. 6 hours  
Manual Mode (MN).....Approx. 1-6 hours

## Tuner

### Receivable channels

	PAL B/G		PAL I	
	Frequency	Channel	Frequency	Channel
VHF (low)	37-42 MHz	E2-E4 X-2	46-53 MHz	A-C X-2
VHF (high)	54-230 MHz	E5-E12 S-330 M1-M10 U1-U10	174-230 MHz	D-J 11-19 S1-S20
Hyper	212-215 MHz	S21-S41	300-470 MHz	S21-S41
UHF	470-862 MHz	E21-E59	470-862 MHz	E21-E59

	SECAM L		SECAM D/K	
	Frequency	Channel	Frequency	Channel
VHF (low)	49-63 MHz	S-4	99-104 MHz	R1-R5
VHF (high)	164-330 MHz	S-10 B-C	300-330 MHz	R6-R12 S1-S20
Hyper	200-210 MHz	S21-S41	300-470 MHz	S21-S41
UHF	470-862 MHz	S1-S5	470-862 MHz	E21-E59

### STANDARD

B/G-A2  
I-NICAM  
L-NICAM  
B/G-NICAM  
D/K-NICAM

## Timer

Programs.....1 month/32 programs  
Clock.....Quartz lock (24-hour digital display)  
Power off memory.....Approx. 5 years (after manufacture)

## Input/Output

VHF/UHF antenna input/output terminal.....VHF/UHF set  
75 Ω (IEC connector)  
Video input.....Input 1, 3 (rear), 2 (front)  
Input level.....1 Vp-p (75 Ω)  
Jacks.....AV connector 2 (Input 1),  
RCA jack (Input 2, 3)  
Video output.....Output 1, 2  
Output level.....1 Vp-p (75 Ω)  
Jacks.....AV connector (Output 1)  
RCA jack (Output 2)  
S-Video input.....Input 1, 3 (rear), 2 (front)  
Y (luminance) - Input level.....1 Vp-p (75 Ω)  
C (colour) - Input level.....286 mVp-p (75 Ω)  
Jacks.....AV connector 2 (Input 1),  
4 pin mini DIN (Input 2, 3)  
S-Video output.....Output 1, 2  
Y (luminance) - Output level.....1 Vp-p (75 Ω)  
C (colour) - Output level.....286 mVp-p (75 Ω)  
Jacks.....AV connector 1 (Output 1),  
4 pin mini DIN (Output 2)

## 2. EXPLODED VIEWS AND PARTS LIST

NOTES: ● Parts marked by "NSP" are generally unavailable because they are not in our Master Spare Parts List.

● The  $\Delta$  mark found on some component parts indicates the importance of the safety factor of the part.

Therefore, when replacing, be sure to use parts of identical designation.

● Screws adjacent to  $\nabla$  mark on product are used for disassembly.

● For the applying amount of lubricants or glue, follow the instructions in this manual.

(In the case of no amount instructions, apply as you think it appropriate.)

### 2.1 PACKING

DVR-5100H-S

## PACKING parts List

Mark No.	Description	Part No.	Mark No.	Description	Part No.

## 2.2 EXTERIOR

**Bond Lock process**  
(Use GYA1011 or GYL1005)  
Paste the bond both to the aluminum  
tape and the side chassis of the  
DRIVE Assy. (■ part)  
The paste point is only this aluminum tape.

Acetate Tape  
(Taping for No.14 FFC)

**Bond Lock process**  
(Use GYA1011 or GYL1005)  
Paste the bond both to the aluminum  
tape and the chassis. (■ part)

Refer to "2.3 FRONT PANEL".

## 4. PCB CONNECTION DIAGRAM

### 4.1 ATAB ASSY

#### NOTE FOR PCB DIAGRAMS :

1. Part numbers in PCB diagrams match those in the schematic diagrams.
2. A comparison between the main parts of PCB and schematic diagrams is shown below.

Symbol in PCB Diagrams	Symbol in Schematic Diagrams	Part Name
		Transistor
		Transistor with resistor
		Field effect transistor
		Resistor array
		3-terminal regulator

3. The parts mounted on this PCB include all necessary parts for several destinations.

For further information for respective destinations, be sure to check with the schematic diagram.

4. View point of PCB diagrams.

## 5. PCB PARTS LIST

NOTES: • Parts marked by "NSP" are generally unavailable because they are not in our Master Spare Parts List.

• The  $\Delta$  mark found on some component parts indicates the importance of the safety factor of the part. Therefore, when replacing, be sure to use parts of identical designation.

• When ordering resistors, first convert resistance values into code form as shown in the following examples.

Ex.1 When there are 2 effective digits (any digit apart from 0), such as 560 ohm and 47k ohm (tolerance is shown by J=5%, and K=10%).

560  $\Omega$   $\rightarrow$  56 x  $10^1$   $\rightarrow$  561 ..... RD1/APU 561J  
47k  $\Omega$   $\rightarrow$  47 x  $10^3$   $\rightarrow$  473 ..... RD1/APU 473J  
0.5  $\Omega$   $\rightarrow$  R50 ..... RN2HR 50K  
1  $\Omega$   $\rightarrow$  1R0 ..... RS1P 1R0K

Ex.2 When there are 3 effective digits (such as in high precision metal film resistors).

5.62k  $\Omega$   $\rightarrow$  562 x  $10^1$   $\rightarrow$  5621 ..... RN1/4PC 5621F

## 6. ADJUSTMENT

### 6.1 TUJB ASSY ADJUSTMENT

\* It is not necessary to adjust the ASSY normally when exchanging the ASSY. But the adjustment is necessary when exchanging the Tuner Module and IC3003 VIF/SIF IC.

No.	Adjustment Name	Adj. Point	Measurement Point	Adjustment Value	Adjustment State
1	VCO freerun frequency (AFC voltage) adjustment	L4002	The solder land named "AFT2" (upper side) Q3901-Emitter	1.90V $\pm$ 0.20V Note1	Terrestrial tuner input through output. Any channel, RF Input > 60dBu System = B/G, I or D/K Manual Adjust (in GUI of Manual Ch Setting) = ON Note1
2	AGC start point adjustment	VR3901	CN3003 Pin1 (AGC)	3.80V $\pm$ 0.20V	Terrestrial tuner input Ch = E9(203.25MHz), Video= Blackburst RF Input = 60.0 $\pm$ 1.0dBu System = B/G, I or D/K

Note 1 : The adjustment spec. is defined without the thermal drift after the power on.  
Therefore, start the adjustment at least 10 minutes after the power on.

#### B TUJB ASSY

SIDE A

Fig.1 Adjustment Points (TUJB ASSY)

## 6.2 MAIN ASSY ADJUSTMENT

\* It is not necessary to adjust the ASSY normally when exchanging the ASSY but confirm the data.

No.	Adjustment Name	Adj. Point	Measurement Point	Adjustment Value	Adjustment State
1	Master clock free-running adjustment (Clock system adjustment)	VC4201	MAIN ASSY IC3402 Pin8 (XTO) (SM8707KV)	27.000000MHZ ± 130Hz	No signal input

### D MAIN ASSY

SIDE A

## 7. GENERAL INFORMATION

### 7.1 SET UP

#### 7.1.1 MODEL TYPE SETTING

• **The Setup is Necessary When :**

- When the MAIN Assy is replaced
- When the TUJB Assy is replaced
- When the MAIN Assy and TUJB Assy are replaced

• **How to Setup the Model**

- After power on, the following screen is displayed on TV monitor.  
Press "32" by using the remote control unit for service (GGF1381).

```
[ Recorder's Model Setting]
Input the number by using the remote for Service.

> --

Input No.      Model
[   31       : DVR-310-S   ]
[   32       : DVR-510H-S  ]
```

- After 1), the following screen is displayed on TV monitor.  
Press "012 (WY)" or "022 (WV)" by using the remote control unit for service.

```
[ Recorder's Type Setting]
Input the number by using the remote for Service.

> ---          (Type -- , Region No. -)

Input No.      Type
[   01       : WY   <Europe>  ]
[   02       : WV   <UK>     ]
```

The setting complete when OSD is disappeared.

- Unplug the power cable.
- Reset the recorder to all its factory settings.
  - Make sure that the recorder is on.
  - Press and hold [STOP] and press [STANDBY/ON] key on the front panel.  
The recorder turns off with all settings reset.
- Enter the Service Mode and then confirm the Model Name "DVR-510H-S/W\*".
  - Make sure that the recorder is on.
  - Press [ESC] then [DISP] keys by using the remote control unit for Service.

```
DVR-510H-S/W*
SYSICON : 2.00
          ComRev   : 1.1140.2.6 $
          FirmRev   : 1.2834.2.4 $
          AppRev    : 1.3873.2.8 $

TUFLCON : 2.18 F      OK
DRIVE    : DVD-RW DVR-106 OK
          1.01L
          CBT0900720WL    OK

H D D    : ----
DEVICE   : PRISM-ES 2.0C
REGION   : 2
C        : *****
```

**Notes :**

- After the setting complete, you can NOT CLEAR the setting data.  
Make sure the pressing number.
- "NG" is appeared on TV when unsuitable number is pressed.  
In such a case, please unplug the power cable and plug it again. Then restart the model setting.

## 7.1.2 CPRM ID NUMBER AND DATA SETTING

### ■ Use DVD Recorder DATA DISC [GGV1134], Service Remote Control Unit [GGF1381] and Remote Control Unit of the model [VXX2888 or VXX2889]

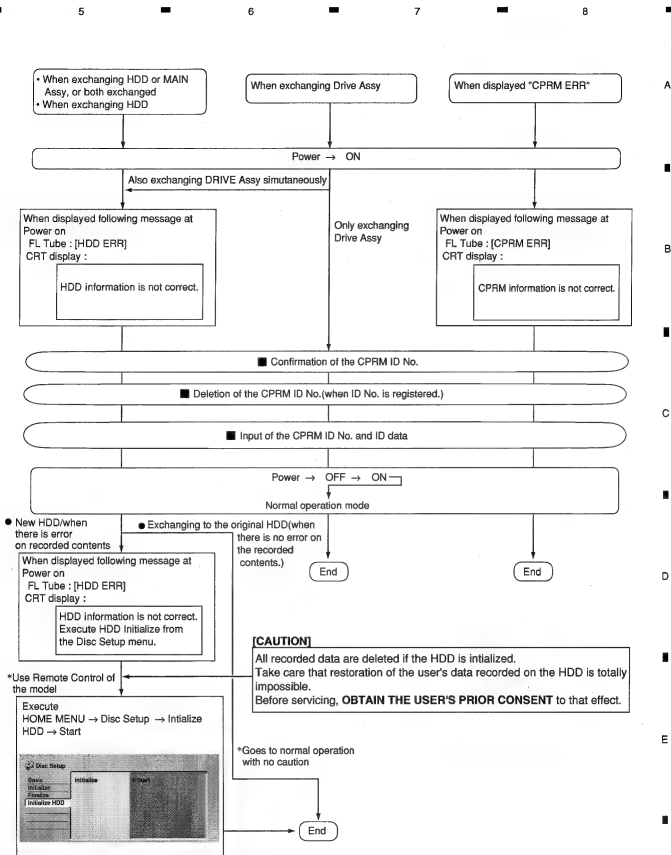

### ■ Entering the ID Number and ID Data for DVD Recorder

For the DVD recorder, it is necessary with the recording/playback of DVD-RW disc to set an individual number (ID number) and ID data to each recorder. If the number and data are not set correctly with the following procedure, operations in the future may not be guaranteed. You will find the ID number to be set on the ID label on the rear panel.

**Important:** If no ID label is found on the rear panel, write down the specified ID number by checking it according to "How to confirm the ID number" shown below.

### ■ The Input is Necessary When:

- "CPRM ERR" is displayed on the FL display immediately after the power is turned on or in Stop mode.
- When the MAIN ASSY, DRIVE ASSY or the HDD is exchanged.

## How to Input the ID Number and ID Data

### Note:

Be sure to enter the ID number in Stop mode.

Use the service remote control (GGF1381) for operations. Only opening/closing of the tray are performed from the player. The ID data disc is swept out automatically after the recorder has read the data from it.

- ① To enter the input mode, press **[ESC]** + **[STEREO]** sequentially in a status with no ID number set, such as after FLASH-ROM downloading.

- ② As number input is enabled when the unit enters the input mode, input the 9-digit ID number. (The entered number is also displayed on the FL display.)

[Recorder's ID Number Setting]  
ID Number ?  
② → >-----  
<CLEAR> Exit  
Input ID Number !

- ③ After inputting the number, press **[SEARCH]** to register the ID number.

[Recorder's ID Number Setting]  
ID Number ?  
> 0 0 0 0 0 0 0 1 OK ?  
③ → <PLAY> Compare Mode  
<SEARCH> Enter  
Input ID Number !

- ④ When the ID number has been registered, the unit enters the ID data input mode. (The FL display indicates "INSERT ID.") In this condition, place the ID data disc on the tray and close the tray using the CLOSE key **[■/▲]** on the player.

[Recorder's ID Data Setting]  
<CLEAR> Exit  
④ → Insert The ID Data Disc !

- ⑤ While the data are being read, the message shown in the figure at left is displayed on the screen. (The FL display indicates "LOAD ID.")

[Recorder's ID Data Setting]  
⑤ → Loading The ID Data Disc !

- ⑥ When the ID data have been read, the data are written to the FLASH-ROM. (The FL display indicates "WRITE ID.")

[Recorder's ID Data Setting]  
⑥ → Wait Rom Writing !

- ⑦ When the ID data have been written to the FLASH-ROM, the message "Rom Write OK" is displayed on the screen. (The FL display indicates "ID DATA OK.")

- ⑧ After confirming this message, press **[CLEAR]** to exit the input mode.

[Recorder's ID Data Setting]  
⑦ → Rom Write OK !  
⑧ → <CLEAR> Exit

## How to Confirm the ID Number

- ① Press **ESC**+**STEREO** sequentially with an ID number already set, and the unit enters the ID number confirmation mode.
- ② The set ID number is displayed on the screen (and on the FL display), permitting you to confirm it.
- ③ To exit this mode, press **CLEAR**.

## How to Clear the ID Number

- ① Press **ESC**+**STEREO** sequentially with an ID number already set, and the unit enters the ID number confirmation mode.
- ② Input the same number as the ID number you have set.
- ③ After inputting the number, press **STOP**.  
Only when the entered number matches the set ID number, the ID number is cleared and the unit exits this mode.  
If the numbers do not match, you must return to step 2.  
(**STOP** is not accepted until 9 digits are entered.)

## 7.2 DIAGNOSIS

### 7.2.1 SERVICE MODE

For service operations, use the GGF1381 remote control unit for service.

The Service-mode screens consist of nine mode screens, which are classified into such rough categories as recording system and VR playback system, and their subscreens.

- **How to enter Service mode** : Press the ESC then DISP keys in turn while no GUI is displayed. The first screen (version information, etc.) shown below is displayed.
- **How to exit Service mode** : Press the ESC key.
- **How to advance to the next Service-mode screen** : While the first screen is displayed, press directly one of the keys 1-9. For service, use the keys 2, 4 or 5, as shown below.
- **How to advance to a subscreen within the same Service-mode screen** : Press the DIG/ANA key. Pressing the DIG/ANA key repeatedly will change the subscreens within the same Service-mode screen cyclically.

#### The Service-mode screens to be used for service are as follows:

- 1 = First screen: Version information, etc.
- 2 = Second screen: ATA/ATAPI debug screen (Writer data)
- 4 = Fourth screen: Error log for the VR recording system
- 5 = Fifth screen: Error log for the VR playback system

**Note:** After entering one of the Service-mode screens, if you wish to shift to another Service-mode screen, exit Service mode first, then reenter Service mode and select your desired Service-mode screen.

#### Description of Each Service-mode screen

##### 1. First screen (version information, etc.)

①	DVR-510H-S/KU			
②	SYSCON : 1.55			
③	ComRev : 1.1231	\$		
	FirmRev : 1.3110	\$		
	AppRev : 1.4416	\$		
④	TUFLCON : 1.21	M	OK	
⑤	DRIVE : DVD-RW DVR-106		OK	
	1.02N			
	CBT0900720WL		OK	
⑥	HDD : WDC XXXXXXXX		80	
⑦	DEVICE : PRISM-ES 2.0C			
⑧	REGION : 2			
⑨	C : *			

**OK** : OK (proper combination)  
**OK+** : Version of the tuner microcomputer too advanced  
**NG-** : Version of the tuner microcomputer too old  
**NG!** : "Type"(e.g. J type, WY type) of Syscom's and TUFL microcomputers are mismatching.

**OK** : OK (proper combination)  
**OK+** : Version of the drive too advanced  
**NG-** : Version of the drive too old

**OK** : Serial No. of the drive already registered  
**NG** : Serial No. of the drive not registered

- |   |   |
|---|---|
| ① Model name/destination  | ⑤ Information on the built-in drive (Model name, version No., serial No.) |
| ② Version of the recorder software  | ⑥ Version No. of PRISM  |
| ③ Revision No. of the system-control computer software (Edition administration No. (from top to bottom, common software, firmware, application software)) | ⑦ Region No.  |
| ④ Version No. of the tuner microcomputer, Mask or flash (M: Mask type, F: FLASH type)   | ⑧ CPRM data (CPRM key No.)  |
|   | ⑨ Data of the built-in HDD, capacity of the HDD                           |

#### Details on HDD data are described below:

HDD : WDC10234564 # 80

WDC : Name of manufacturer, part No. by manufacturer  
 10234564 : Capacity of the HDD (unit: Gbytes)  
 # 80 : HDD identification error indication

If any abnormality exists in HDD connection, the indications shown in Table 1 below are displayed.

Table 1: HDD data indications according to various HDD connection statuses

HDD identification conditions	Example of HDD data to be displayed	Remarks
Failure in physical identification of HDD (no connection, defective HDD, interface error)	Blank space	
Physical identification of HDD possible, but not identified	WDC 10234564 # 80	"#" is displayed as HDD identification error
Physical identification of HDD possible, HDD identified, but failure in physical formatting	WDC 10234564 ! 80	"!" is displayed as HDD identification error
Physical identification of HDD possible, HDD identified, and correct physical formatting (HDD correctly identified)	WDC 10234564 80	

While the first screen shown above is displayed, press the DIG/ANA key to enter the subscreen shown below.

**Note:** Each time the DIG/ANA key is pressed, the display changes between the first screen and its subscreen.

#### • Subscreen 1: Result of error-rate measurement

ERR RATE : x.x%-x/

**Note:** Be sure to start playback after displaying this subscreen to calculate the error rate.

During playback in VR mode, the average error rate of the past 10 VOBUs is displayed, and during playback in DVD-Video or Video mode, the average error rate of the past 256 sectors is displayed. During playback in VR mode, the rotation rate of the drive (/: normal speed, no display = double speed) is also displayed.

#### • Subscreen 2: HDD information

HDD Info  
Life Time: 87599h 09m 05s

Cumulative HDD-on time

#### • How the data on cumulative HDD-on time are processed in memory

Storage place: Backup SRAM, Flash ROM

Timing of referring to the data on cumulative HDD-on time: When the power is turned on, the backup SRAM is referred to regarding the data on cumulative HDD-on time, and the data are stored in the RAM. If referring to the backup SRAM fails, the flash ROM is referred to.

Timing of updating the data on cumulative HDD-on time: While the HDD is on, the data on cumulative HDD-on time in the RAM is updated every 3 seconds, and every time updating is executed the data are stored in the backup SRAM. When the power is turned off, the data are stored in the flash ROM.

#### How to clear the data on cumulative HDD-on time

**Backup SRAM:** When the HDD Identification Setting is performed, the data on cumulative HDD-on time are automatically cleared. The HDD Identification Setting is automatically performed when the CPRM setting is performed on the CPRM setting screen (to display the CPRM setting screen, press the ESC then the STEREO keys).

**Notes:** The data on cumulative HDD-on time are not cleared when resetting to factory-preset values is performed.

The data on cumulative HDD-on time are not cleared when the system-control computer software is downloaded.

**Flash ROM:** The data on cumulative HDD-on time cannot be cleared (they are not cleared even if resetting to factory-preset values is performed or if the system-control computer software is downloaded).

**Note:** The data on cumulative HDD-on time in the flash ROM can be cleared if you clear the data in the backup SRAM following the above-mentioned procedures then turn off the power of the unit, because the data in the backup SRAM are stored in the flash ROM when the power is turned off.

## 2. Second screen (ATA/ATAPI debug screen)

Subscreen 1 of the second screen is displayed when the ESC, DISP, then "2" keys are pressed, in that order.

**Note:** Each time the DIG/ANA key is pressed, the display changes cyclically among subscreens 1 to 4.

### • Subscreen 1: Command log (ALL) of ATA/ATAPI DEBUG OSD

```
ATA/ATAPI History-ALL
32 0100000000000000A000 OK
32 2A000000DEBB000063000 OK

32 2A000000DF81000063000 OK
32 2A000000DFE4000062000 OK
32 2A000000E046000063000 OK
32 2A000000E0A9000063000 OK
32 2A000000E10C000063000 OK
>32 2A000000E16F00006200023A00
```

### • Subscreen 2: Command log (ERROR) of ATA/ATAPI DEBUG OSD

### • Subscreen 3: Writer maintenance information of ATA/ATAPI DEBUG OSD

The cumulative power-on time and error log that are administered by the writer are displayed. Such information is obtained when the power is turned on. Thereafter, each time the SEARCH key on the remote control unit for service is pressed while subscreen 3 is displayed, the updating command is sent, and the data on the subscreen are updated. Care must be taken when updating this subscreen, because an undesired command is inserted if it is executed while recording, etc.

ATA/ATAPI Writer Maintenance Info	
① Power ON	00 00 00 0000 00000000
0102:56	01 00 00 0000 00000000
DVD	02 00 00 0000 00000000
② R0053:48	03 00 00 0000 00000000
③ W0022:16	04 00 00 0000 00000000
CD	05 00 00 0000 00000000
④ R0034:04	06 00 00 0000 00000000
⑤ W0000:00	07 00 00 0000 00000000
	00-00

Error log for the Writer

- ① Power-on time/cumulative power-on time
- ② Duration of emission of the laser diode (LD) for DVD-R/DVD while reading
- ③ Duration of emission of the LD for DVD-W/DVD while writing
- ④ Duration of emission of the LD for CD-R/CD while reading
- ⑤ Duration of emission of the LD for CD-W/CD while writing

#### • Subscreen 4: ATA/ATAPI DEBUG OSD\_LD degradation judgment

The degrees of degradation of the LD (laser diode) for the writer (LDs for CD and DVD separately), temperature, and RF level are displayed. To update the data on the subscreen, press the SEARCH key on the remote control unit for service while subscreen 4 is displayed. See Table 2 below for a description of each item and the conditions for updating data.

ATA/ATAPI - LD Degrade			
①	CD	:0070 104%	OK
②	DVD	:0068 96%	OK
③	TMP	:00A3 41 °C	
④	ADJ	:0067 26 °C	
⑤	RF	:3D70	

**Table 2: Description of each item and conditions for updating data**

No.	Item	Description	Conditions for updating by pressing the SEARCH key	Remarks
①	CD	Degradation judgment of LD for CD. Regarded as NG when the value is 120% or higher (same standard as for the PC drive)	No disc inserted in the disc tray	*1
②	DVD	Degradation judgment of LD for DVD. Regarded as NG when the value is 120% or higher (same standard as for the PC drive)	No disc inserted in the disc tray	*1
③	TMP	Current temperature inside the Writer	No disc inserted in the disc tray	*1
④	ADJ	Temperature (approx. 25°C) inside the Writer during adjustment	No disc inserted in the disc tray	*1
⑤	RF	RF level (16-bit data, proportional calculation performed using the actual RF level value with 2.5 V = 0xFFFF as the maximum value, displayed in 4-digit hexadecimal)	During playback of disc medium	

\*1 : For correct judgment, after leaving the unit at a normal temperature for some time, judgment must be performed immediately after the unit is turned on with no disc loaded.

### 3. Fourth screen (VR-recording-related error log)

Subscreen 1 of the fourth screen is displayed when the ESC, DISP, then "4" keys are pressed, in that order.

**Note:** Each time the DIG/ANA key is pressed, the display changes cyclically among subscreens 1 to 11.

#### • Subscreen 1:

```
RunFnc : --- Ecl : **** Rate : **
-----
-----
-----
-----

    L02:4103 Tp:VobDif+
    L02:4104 Tp:VobDof-
```

##### ① Data on location of the display

Original(G)/play list (L), title No., chapter No. (X:XX-XX), time of the display (min, sec, frame [XXmXXsXX]), busy mark of the virtual mechanical-control computer (#), error rate of the transfer data (X.XeXX), playback logical address (ID [XXXXXXXX])

##### ② Error message log

Original(G)/play list (L), title No., time of generation (min, sec [XX:XX]), playback-related error log for the last 13 errors (XX:XXXXXXXX)

##### Notes:

- For details on error messages, see Table 3 "Description of VR-playback-related errors".
- If a VR-playback-related error is generated, a problem in data reading from the disc may be suspected. (The possibility of a problem on the drive side is high.)

##### • Subscreens 3 and 4:

These subscreens are not for service use.

A

Table 3: Description of VR-playback-related errors

Error Message	Description
Tr : NullBlk	Transfer task: NULL at the top block (Detecting NG stream made at the DVR-1000 series and starting protection process.)
Tr : ReadErr	Transfer task: ATA read error
Tr : SchlLate	Transfer task: ATA search late
Tr : SemTOvr	Transfer task: Timeout for gaining semaphore (no synchronization with the display)
Tr : NaviErr	Transfer task: Inconsistency between NAVI (navigator) of management data and actual NAVI
Tr : OrderEr	Transfer task: Inconsistent order
Mn : Av1Hang	Main task: Detects hang-up of AV decoder and starts recovery
ERR_RCVI	TPP task: Detects hang-up of AV decoder and starts recovery
Tr : VobDif+	TPP task: The decoder STC advances by 1 VOB hour.
Tr : VobDif-	TPP task: The STC of the management information advances
Tr : midNULL	TPP task: The management information pointer designated was NULL.
Tr : ScanNg	TPP task: Failure to set the TPP memory when scanning was canceled.
Tr : RStepEr	TPP task: Although the reverse step had failed, the operation was forcibly terminated because the top cell was located.
Tr : tppErr	TPP task: Inconsistency occurred.
Rv : 1stTOvr	Reverse playback task: Timeout for waiting for interruption to the top VOB immediately after starting decoding
Rv : OpnTOvr	Reverse playback task: Timeout for waiting for B-picture of the open GOP immediately after starting decoding
Rv : OptTOvr	Reverse playback task: Timeout for waiting for I-picture of the open GOP immediately after starting decoding
Rv : LnkTOvr	Reverse playback task: Timeout for waiting for link
Rv : LnkFail	Reverse playback task: Starts compensation by detecting link failure
Rv : R2FTOvr	Reverse playback task: Starts retrieval after detecting timeout from reverse pause to forward pause
Rv : TopVbEr	Reverse playback task: Forced termination because of a possible error of the top data during reverse normal playback
Rv : OrderEr	Reverse playback task: Inconsistent order
Av : B/CTOvr	AV1: Buffer-clear timeout
Av : StrmOvr	AV1: Timeout for waiting for stream ready
Av : TpmTOvr	AV1: Timeout for TP mode change
Av : SpmTOvr	AV1: Timeout for a step command
CC_OS_ERR	Closed caption task: OS error

**Abbreviations:**

STC = System Time Clock  
 VOB = Video Object Unit  
 GOP = Group of Picture  
 B-picture = Bidirectionally predictive-picture

I-picture = Intra-picture  
 P-picture = Predictive-picture  
 TP mode change = AV1 term (Trick Play mode change)

E

F

Table 4: Description of VR-recording-related errors

Error Message	Description	Error Message	Description
Non Err *	Normal	Invalid TMVMG	Invalid TMP_VMG1 content
DRAM NG	Abnormality in access to the work DRAM	Unmatch Stamp *	Impossible to modify because of nonmatching time stamps
SRAM NG	Abnormality in access to the backup work SRAM	Virgin DISC	Blank disc
CPRM IC NG	Inappropriate CPM IC	Fail Repair	Repair failed
Drive Destroy	The drive has crashed.	ReadOnly DISC	Because some data are invalid, data cannot be written.
MKB REVOKED	Error in gaining data	Rzn Rsv NG?	R-zone reserve failed.
WM Cracked	WM cracked	Rzn Cls NG	R-zone Closure failed.
VBR-SRAM NG	Abnormality in VBR SRAM	Rzn Rpr NG	R-zone repair failed.
BK BATT Down	Backup RAM data has been erased.	Bdr Con	Opening of border failed.
BK FSYS Dirty	Backup RAM data has been written on the file system.	Bdr Cls	Closing of border failed.
Stream NG	Inappropriate input stream data	Format NG	Formatting failed.
Strm Start NG	Failure to start encoding (reasons not clear)	OPC NG	OPC failed.
AVEnc Hang	Inappropriate MPEG encoder	PCA Full	PCA has been used up.
No SysHr IN	System packet is not input periodically.	RMA Full	RMA has been used up.
Strm Start NG	Timeout waiting for system packet input at the beginning.	SW Vrec mode *	Switching to video recording routine is required.
IN Encods *	Changes cannot be made in the process of encoding.	SW Vpb mode *	Switching to video playback routine is required.
EncModul Hang	Encoder routine is hung up.	NV Pck MK Err	Error in creating NAVI pack
Ourobor Strm NG	Inappropriate stream data to the Ouroboros input	NV Pck DMA Err	Inappropriate NAVI pack DMA
WaterMark Det	Watermark detected	Cell Closure NG	Cell closure failed.
BUE Overflow	Overflow of the stream buffer	Something *	Undetermined error
Drive Hang	The drive is hung up.	Status NG *	Abnormality in change of statuses
Write Err	The drive failed to write and could not be recovered.	Err Action *	Incorrect action
Read Err	Reading failed. ECC failed, etc.	Abort *	Cancellation
Drv Hard Err	Abnormality in the drive hardware or firmware	Repair Exec	Repairing has been executed.
Mech No Res	No response from the mechanical control computer	Format Exec	Formatting has been executed.
Drv TimeOut	Timeout waiting for drive operation	BUG	Some bugs
NWA Exhaust	NWA surpassed and impossible to use	BusReset Done	Bus Reset has been executed.
MKB Invalid	MKB reading error	Task No Activ	Task has not been activated.
Drv Err	General error of the drive	Mem get NG	Video mode memory has not been ensured.
DISC Full	No further data can be written because the disc is full.	V Rsv RzoneNG	Video mode reserve R-zone failed.
No More Info *	No more space in the internal work-management area	Tracon Tm NG	Video Mode Tracon transfer has not been completed.
No Perm *	No permission to write to the disc	DRAM CLR Err	Video Mode DRAM (Stream Buffer) clear failure
Limit Over *	Standard maximum limit exceeded	VTSI_3 Wr Err	Video Mode VTSI BUP write error
Rec Pause *	No operation permitted during recording pause	VTSI Wr Err	Video Mode write error
No Video *	No video input (not locked)	TMP_VMG Wr Err	Video Mode TMP_VMG1 write error
Relocation Do	VR-recording data was relocated.	PLS Rzn Fail	Video Mode Reserve R-zone failure
Invalid Param *	Invalid parameter	V Categ ID NG	Inappropriate Category ID
Protect Src *	Source to be recorded is copy-protected.	V Cate Int NG	Inappropriate Category information
Now Busy *	In the process of the emergency processing	V Ext TY NG	Typing error
Invalid Disc *	The disc cannot be recognized.	V Ext MAX Ovr	Count MAX exceeded
Invalid UDF *	Invalid UDF content	V Ext Too Big	The extension file is too large.
Invalid VMG *	Invalid VMG content	HDD Destroy	HDD not recognized on the bus.

**Notes:**

- \* Any error message marked with \* is displayed "RecErr : -----" on the Subscreen 1 of the fourth screen.
- : Indicates an error of the MPEG encoder
- : Indicates an error of the drive system
- In a case of an error in the drive system, scratches or dirt on a disc, or a problem of the drive itself (dirty pickup) may be suspected.

**Abbreviations:**

- ECC = 4 Byte Code for Error Correction
- UDF = Universal Disk Format
- PCA = Power Calibration Area
- OPC = Optical Power Control
- NWA = Next Writable Address

- VMG = Video Manager
- RMA = Recording Management Area
- MKB = Media Key Block
- TMP\_VMG1 = Temporary Video Manager Information
- Border = from Lead-in to Lead-out

**Table 5: Description of VR-recording-related errors (related to the HDD)**

Error Message	Description
HDD unauthor	Inconsistent HDD serial No.
TT Rec Over	Title recording time full
HDD Reset Done	HDD Reset executed
HDD Buff High	Higher-level process executed for the HDD buffer
HDD Trans Err	DMA error in HDD copy transfer
HDD Zero WR	MBR readout generated
HDD Initialize	HDD initialized
HDD MBR NG	Inconsistent MBR data
HDD SiG NG	Inconsistent HDD Management Data Magic
HDD INFO BAD	Incorrect HDD Management Data
HDD IRRG POFF	Abnormal power off
HDD SMART NG	Inappropriate HDD SMART
VC HDD Info NG	Obtaining Video Mode Copy HDD Cell information failed
VC Pck Anl NG	Analyzing Video Mode Copy Pack failed
VC VOBu SizeE	Inappropriate Video Mode Copy VOBu Size
Strm TransfNG	Inappropriate Video Mode Copy Stream Transfer
VC FlushC NG	Inappropriate Video Mode Copy Flush Cache
VC Transf Stp	Video Mode Copy Transfer Stop
VC CopyCancel	Video Mode Copy Cancel
VC Idling NG	Video Mode Copy idling failed
VC TSO BLK NG	Video Mode Copy TSO Block transfer not completed
VC Cell Max	Maximum number for Video Mode Copy Cells exceeded
VC HDD Inf NG	No information on Video Mode Copy HDD
VC HDD C Err	Inappropriate Video Mode Copy HDD content

**Table 6: List of Key Codes**

**How to enter each check mode**

Test mode remote control unit : [A8\*\*]

Remote control unit supplied with the DVR : [AB\*\*]

No.	Check Item	Key Input	Operation / purpose	Remarks
1	EE system (same as preview)	[ESC] → [A.MON]	Turns on/off EE mode cyclically	Make sure that CGMS = 11 becomes when CGMS = 10 is input. EE mode: Simulation mode for recording status
		[PLAY]	Starts the EE system in EE mode (main-unit setting rate)	
		[STOP]	Stops the EE system in EE mode	
2	Error-rate measurement	[ESC] → [SIDE B]	<b>V-mode recording:</b> After recording for 10 seconds, the unit starts playback while displaying the error rate. <b>DVD-Video:</b> The error rate is automatically measured, then the result will be displayed.	For details, see "7.2.3 ERROR RATE MEASUREMENT".
3	Settings for specific areas	[ESC] → [CHP/TIM]	Enters Adjustment mode for AVIO settings	Settings are made for the selected input (TUNER, LINE).
		[ESC]	Determines the settings, then exits Adjustment mode	For details, see "7.2.4 SETTINGS FOR SPECIFIC AREAS".

**How the ESC code is processed**

- When the ESC code is received, ESCAPE mode is entered, but in combination with the code(s) that follow(s), a specific meaning is added.
- If ESC codes are received continuously, ESCAPE mode is retained.

## 7.2.2 DV DEBUG MODE

Press the ESC, DISP, then "3" keys, in that order.

① (DV/1394) Init:OK AV:01 DV:01 INT4:02  
 ② [Recorder] GUID:00E036000160001 IRM  
 ③ iPCR:C03F0000 oPCR:0000007A  
 ④ [DV] GUID:00808B0303480E96  
 ⑤ VN:VICTOR MN:GR-D50K  
 ⑥ TM:C3 TS:75 CT:32 WP:01 PS:FF OS:00  
 ⑦ [DVdecoder:Yes]  
 ⑧ TC:00h20m35s02f RD:02/02/05 RT:10h34m50s  
 ⑨ ASPECT:4:3 CGMS:000000 APSTB:00 DEC:525-60  
 ⑩ SF:32kHz QU:12bit AMODE:4) Stereo  
 ⑪ [DVencode:No]  
 ⑫ TC:-h-m-s-f RD:-f-f-f-f RT:-h-m-s  
 ⑬ ASPECT:----- CGMS:-- APSTB:--

Boldface alphanumeric : Fixed indications  
 Nonboldface alphanumeric : Variable indications

No.	Item	Description	Remarks
①	Init	Whether the initialization of uPD72893A (1394LINK & DVcodec IC) has been completed (OK) or not (NG)	In a case of NG, communication with uPD72893A may have failed.
	AV	Number of AV devices on the local bus	
	DV	Number of DV devices on the local bus	If the number does not become 01 even if a DV device is connected, identification of that device fails.
	INT4	Number of executing INT4(PIO) interrupt processing routines until a POWER ON notification arrives from uPD72893A (normally, 02)	
②	GUID	GUID set in ConfigROM of the unit	In a case of ROOT (IRM), IRM is displayed at the rightmost of the GUID indication
③	iPCR	iPCR value of the unit	
	oPCR	oPCR value of the unit	
④	GUID	GUID set in ConfigROM of the connected DV device	Data are displayed only if one DV device is identified. If the connected DV device is ROOT (IRM), IRM is displayed at the rightmost of the GUID indication
⑤	VN	Vendor name set in ConfigROM of the connected DV device	Data are displayed only if one DV device is identified. (Depending on the device, the vendor name may not be set in ConfigROM.)
	MN	Model name set in ConfigROM of the connected DV device	Data are displayed only if one DV device is identified. (Depending on the device, the vendor name may not be set in ConfigROM.)
⑥	TM	Transport Mode data obtained from the DV device	Data are displayed only if one DV device is identified.
	TS	Transport State data obtained from the DV device	
	CT	Cassette Type data obtained from the DV device	
	WP	Copy-protection data obtained from the DV device	
	PS	Power-state data obtained from the DV device	
	OS	Output signal mode data obtained from the DV device	
⑦	[DVdecode:XXX]	Whether Yes (in the process of requesting DV input) or No is indicated in XXX	Normally, Yes is indicated only when CH is set to DV

No.	Item	Description	Remarks
⑧	TC	Time-code data of the DVdecode Stream, or response data of the Time Code command	Stream time-code data are obtained when playback in the forward direction is performed. Otherwise, time-code data are obtained through an AV/C command.
	RD	Rec Date of DVdecode Stream	
	RT	Rec Time of DVdecode Stream	
⑨	ASPECT	Aspect Ratio of DVdecode Stream	
	CGMS	CGMS of DVdecode Stream (from left to right, CGMS data of bits 5-4: Audio ch2, bits 3-2: Audio ch1, and bits 1-0: Video)	Recording of DV input cannot be performed unless the value of CGMS is 00.
	APSTB	APS trigger bit of DVdecode stream	
	DEC	With/without DVdecode stream input	With input: Signal type (525-60, 625-50, 1125-60, 1250-50, or Invalid) is indicated, Without input: "No" is indicated.
⑩	SF	Sampling Frequency of DVdecode Stream	If SF is 44 kHz, it is considered that 44.1-kHz audio is input, and sound is muted on the unit.
	QU	QUANTIZATION of DVdecode Stream	
	AMODE	AUDIO MODE of DVdecode Stream	
⑪	[DVencode:XXX]	Whether Yes (in the process of requesting DV output) or No is indicated in XXX	Normally, Yes is indicated only with HDD or DVD playback
⑫	TC	TIME CODE of DVencode stream	
	RD	REC DATE of DVencode stream	
	RT	REC TIME of DVencode stream	
⑬	ASPECT	Aspect Ratio of DVencode stream	
	CGMS	CGMS of DVencode stream (common to video, audio ch1 and audio ch2)	Normally, sources other than CGMS=00 are not output.
	APSTB	APS trigger bit of DVencode stream	

## Simple Diagnosis

Symptoms	Location in the Debug Screen	Items to be Checked, and Conditions	Possible causes
No operation for either DV input or output	①	<p>Check the init indication:</p> <p>OK: Initialization of DV-related LSIs (IC5101, IC5202) appropriately completed</p> <p>NG: Communication failure between DV-related LSIs (IC5101, IC5202) and IC5102 microcomputer (IC1001). Initialization of DV-related LSIs (IC5101, IC5202) has not been completed properly.</p> <p>Check the number of DV devices when one DV device is connected to the recorder:</p> <p>01: The connected DV device is correctly identified.</p> <p>Other than 01: The connected DV device is not correctly identified.</p> <p>Check of DV decoding when the recorder channel is set to DV:</p> <p>Yes: The recorder is in the process of a DV input operation</p> <p>No: The recorder is not executing a DV input operation</p>	Defective IC, defective soldering, defective power supply, etc.
No picture nor sound for DV input	②	<p>Check DEC:</p> <p>525-60: An NTSC DV signal is input from the DV device.</p> <p>825-500: A PAL DV signal is input from the DV device.</p> <p>No: No DV signal is input from the DV device.</p>	Defective DV terminals, improper connection of the DV-terminal board, defective IC, defective cables, an IEEE 1394 device other than the DV device connected
DV input recording impossible	③	<p>Check CGMS:</p> <p>00: A copy-permitted source is being input.</p> <p>Other than 00: A copy-protected source is being input.</p>	Defective DV terminals, improper connection of the DV-terminal board, defective IC, defective source device <b>Note:</b> As to a model having the Input Line System setting, if the setting and the actual input signal system do not match, no picture appears.
No sound for DV input	④	<p>Check SF:</p> <p>32 kHz: An audio signal with 32-kHz sampling frequency is being input.</p> <p>48 kHz: An audio signal with 48-kHz sampling frequency is being input.</p> <p>44 kHz: An audio signal with 44.1-kHz sampling frequency is being input.</p>	Recording cannot be performed for a copy-protected source.
No picture nor sound for DV output	⑤	<p>Check DVencode during DVD/HD playback:</p> <p>Yes: The recorder is in the process of a DV output operation</p> <p>No: The recorder is not executing a DV output operation (No is also displayed during playback of copy-prohibited sources or simultaneous-recording/playback)</p>	An audio signal with 44.1-kHz sampling frequency is muted.
			Defective IC, defective soldering, defective power supply, etc.

## 7.2.3 ERROR RATE MEASUREMENT

### How to enter Error-Rate Measurement mode

Press the ESC key then the SIDE-B key of the remote control unit for service to enter Error-Rate Measurement mode. During playback of DVD-VIDEO, Error-Rate Measurement mode can also be entered by pressing the ESC key then the PLAY key.

### How to exit Error-Rate Measurement mode

Press the ESC key. The error-rate display disappears, and Error-Rate Measurement mode is exited.

**Note:** The error rate cannot be measured in VR mode or during CD playback.

### Functions

#### 1. While "DVD" is selected(\*)

##### ① -1 Video-mode recording (recording medium)

In this mode, DVD recording is automatically performed for 10 seconds, the recorded DVD title is played back while the error rate is being measured, then as soon as playback of the recorded DVD title is finished, playback stops.\*1 After error-rate measurement is finished, the average error rate will be displayed on the FL display and OSD. Only in a case in which the calculation of the average error rate fails, the tray will open.

##### ② -2 DVD-VIDEO (playback medium)

Only during playback, when the ESC key then the SIDE-B key (or the ESC key then the PLAY key) are pressed, the error rate is calculated and displayed on the FL display and OSD.\*2 Only in a case in which the calculation of the average error rate fails, the tray will open.

#### 2. While "HDD" is selected(\*)

In this mode, HDD recording is automatically performed for 10 seconds. Then HDD- to - DVD- copy is performed.

Then DVD is selected automatically and the copied DVD title is played back while the error rate is being measured, then as soon as playback of the recorded DVD title is finished, playback stops. After the error-rate measurement is finished, the average error rate will be displayed on the FL display and OSD. Only in a case in which the calculation of the average error rate fails, the tray will open.

(\*) : to change the mode between DVD and HDD, press the HDD/DVD key on the front of the recorder.

### Changes of display

Table 1: Video mode (recording medium) while "DVD" is selected

Operation	Display	
	FL Display	OSD (On Screen Display)
"ERROR RATE" is displayed on the FL display for an instant.	ERROR RATE	
DVD recording starts.	ERROR RATE	
DVD recording is performed for 10 seconds.	x x x x x . . .	
The recorded DVD title is played back while the error rate is being measured, then as soon as playback is finished it stops.	ER x . x E - x	ERR RATE : x . x E - x
After error-rate measurement is finished (*1), the average error rate, the measurement-finish mark (*), and the OK/NG-judgment result (*3) will be displayed on the FL display and OSD. (If the tray opens as a result of NG judgment, the display on the FL display and OSD will be retained.)	ER x . x E - x	ERR RATE : x . x E - x OK

Table 2: DVD-Video (playback medium)

Operation	Display	
	FL Display	OSD (On Screen Display)
Only during playback, when the corresponding keys are pressed, the error rate is calculated and displayed on the FL display and OSD. (*2)	ER x . x E - x	ERR RATE : x . x E - x
After error-rate measurement is finished (*1), the average error rate, the measurement-finish mark (*), and the OK/NG-judgment result (*3) will be displayed on the FL display and OSD. (If the tray opens as a result of NG judgment, the display on the FL display and OSD will be retained.)	ER x . x E - x	ERR RATE : x . x E - x OK

Table 3: Video mode (recording medium) while "HDD" is selected

Operation	Display	
	FL Display	OSD (On Screen Display)
"ERROR RATE" is displayed on the FL display for an instant.	ERROR RATE	
HDD recording starts.	ERROR RATE	
HDD recording is performed for 10 seconds, then HDD-to-DVD-copy is performed.	XXXXXXXXXX	
The copied DVD title is played back while the error rate is being measured, then as soon as playback is finished it stops.	ERR X.XXE-X	ERR RATE : X.XE-X
After error-rate measurement is finished (*1), the average error rate, the measurement-finish mark (*), and the OK/NG-judgment result (*3) will be displayed on the FL display and OSD. (If the tray opens as a result of NG judgment, the display on the FL display and OSD will be retained.)	ERR X.XXE-X	ERR RATE : X.XE-X OK

\*1 : Whether error-rate measurement is finished or not is judged, as shown in Table 4 below.

Table 4: On judgment whether error-rate measurement is finished or not

Recording Mode	Judgment whether error-rate measurement is finished or not	Recording/playback duration required for error-rate measurement
Video mode	After playback of a certain amount (*) of data Measurement of the 16 ECC blocks is performed 16 times, then the grand sum is used for calculation of the error rate. The capacity is as follows: 16 ECC blocks × 16 sectors × 2048 bytes × 16 times = 8389608 bytes = 67108864 bits	The time required for completion of error-rate measurement varies, depending on the input video signal to be recorded. (The more the motion in the input video signal to be recorded is animated, the shorter the playback time required for completion of error-rate measurement becomes.)

\*2 : During DVD-VIDEO error-rate measurement, even after error-rate measurement is finished, playback continues, and the display of the error rate results is retained. In this playback mode, if Error-Rate Measurement mode is exited by pressing the ESC key, then it is reentered by pressing the ESC and SIDE-B keys (or ESC and PLAY keys), the error rate will not be updated, and the previous value is displayed. To reset the previous error rate, stop disc playback.

\*3 : OK/NG judgment

In DVD/VIDEO and Video Mode recording, OK/NG judgment is displayed under the following conditions:

Table 5: List of OK/NG threshold values

Disc Type	Recording Mode	Finalized or not finalized	Reference Value	Display
DVD-VIDEO			$8.0 \times 10^{-4}$	OK / NG
DVD-R	Video mode	Finalized	$1.0 \times 10^{-3}$	OK / NG
		Not finalized	$1.0 \times 10^{-3}$	OK / NG
DVD-RW	Video mode	Finalized	$1.0 \times 10^{-3}$	OK / NG
		Not finalized	$1.0 \times 10^{-3}$	OK / NG

## 7.2.4 SETTINGS FOR SPECIFIC AREAS

**Purposes:** Depending on the area, jitter may appear in a picture received by the tuner, as conditions of signals received by the tuner are different from area to area. To correct this kind of problem, the function of the System Codec AVIO control section for adjusting signals received by the tuner can be used.

**How to enter setting modes:** To enter General Setting mode, press the ESC key then the CHP/TIM key of the remote control unit for service. To enter Specific Channel Setting mode, press the DIG/ANA key in General Setting mode.

**How to exit setting modes:** Press the ESC key. The setting mode is exited, the OSD disappears.

### 1. General Setting mode

This mode can be entered only during recording/playback stop. In this mode, each item and its current settings are displayed on the OSD. The currently selected input mode (TUNER or LINE) is displayed. If L1, L2, L3 or DV is selected for input, general settings for the line input can be made, and if TUNER is selected, general settings for the tuner input can be made.

#### [General Setting mode] (\*2)

AVIO Specific Area Mode  
Input - [ TUNER ]  
Sync AGC : ON \*  
Threshold : Manual Threshold Level  
Threshold Level : 0 \*

\* : setting is the default.

**Table 1: Key operations in General Setting mode** (effective only during recording/playback stop)

Key	Operation	Setting (*: Default)	Remarks
INPUT SELECT, CHANNEL +/- (*R)	Switches inputs or channels.	-	-
◀ x3, x3 ▶ (*1)	Sets Sync AGC.	ON (*) / OFF	-
◀ CHAPTER SKIP, CHAPTER SKIP ▶ (*1)	Sets Threshold.	(*) Normal Auto Threshold Level Manual Threshold Level Pedestal Level	-
◀ STILL STEP, STILL STEP ▶ (*1)	Sets Threshold level.	According to the setting of Threshold, the values can be changed within the range mentioned below.  • Normal: The value is fixed, with no display of the value.  • Auto Threshold Level: 0-8 (Default: 0)  • Manual Threshold Level: 0-8 (Default: 0)  • Pedestal Level: 0-8 (Default: 0)	-  The value can be changed with the ◀ or ▶ key. The value can be changed with the ◀ or ▶ key. The value can be changed with the ◀ or ▶ key.
CLEAR (*1)	Initializes the setting of General Setting mode.	-	Pressing the key resets all settings of General Setting mode to the initial values. Settings of Specific Channel Setting mode are not affected (they are retained).
ESC	Exits AVIO setting for specific areas, clearing the OSD.	-	-

\*R: Refers to keys on the remote control unit supplied with this unit. The keys without "R" refer to the remote control unit for service.

- \*1 : When a setting value is changed, that value is immediately displayed and is stored in nonvolatile memory.  
 • Settings made will not be reset to the default settings even if resetting to the factory-preset values is performed.
- \*2 : In General Setting mode, if the channel displayed has specific settings, the following will be displayed.

**[Display in General Setting mode when the channel currently displayed has specific settings]**

AVIO Specific Area Mode  
 Input - [ TUNER ]  
 Sync AGC : ON \*  
 Threshold : Manual Threshold Level  
 Threshold Level : 0 \*  
  
 This channel is set up  
 Individually.

## 2. Specific Channel Setting mode

This mode is entered when the DIG/ANA key is pressed in General Setting mode. In this mode, specific settings can be made for up to 12 channels. For channels that do not have specific settings, the settings of General Setting mode are applied.  
 Display in Specific Channel Setting mode (A picture from the tuner can be viewed using the semitransparent OSD display.)

**[Display in Specific Channel Setting mode]**

**[When specific channel settings have NOT been made]**

AVIO Specific Area Mode	
Input - [ TUNER ]	
Sync AGC : ON *	→ General Setting data
Threshold : Manual Threshold Level	
Threshold Level : 0 *	
Individual setting state	
Input Channel - [ 1CH ]	
Sync AGC : --	→ Specific Channel Setting data
Threshold : ----	
Threshold Level : --h	

**[When specific channel settings have been made]**

AVIO Specific Area Mode	
Input - [ TUNER ]	
Sync AGC : ON *	→ General Setting data
Threshold : Manual Threshold Level	
Threshold Level : 0 *	
Individual setting state	
Input Channel - [ 1CH ]	
Sync AGC : ON	→ Specific Channel Setting data
Threshold : Manual Threshold Level	
Threshold Level : 3	

\* : setting is the default.

- If a channel that does not have specific settings is displayed, the setting figures are displayed as hyphens (-). If the setting figures are not displayed as hyphens, those settings have been specifically set even if they are identical to the default settings or those of General Setting mode.
- The channels to be displayed in "Input Channel" are as follows:
  - In a case of line input: L1-L3, DV
  - In a case of tuner input: Received channel (a channel to be set in specific channel settings)

**Table 2: Key operations in Specific Channel Setting mode**

(effective only during recording/playback stop)

Key	Operation	Setting (*: Default)	Remarks
DIG/ANA	Switches cyclically between General Setting mode and Specific Channel Setting mode.	—	—
INPUT SELECT, CHANNEL +/- (*R)	Switches inputs or channels.	—	—
◀x3, x3▶(*1)	Sets Sync AGC.	ON (*) / OFF	—
◀◀ CHAPTER SKIP, CHAPTER SKIP ▶▶	Sets Threshold.	(*) Normal Auto Threshold Level Manual Threshold Level Pedestal Level	—
◀◀ STILL STEP, STILL STEP ▶▶	Sets Threshold level.	According to the setting of Threshold, the values can be changed within the range mentioned below.	—
		* Normal: The value is fixed, with no display of the value.	—
		* Auto Threshold Level: 0-8 (Default: 0)	The value can be changed with the ◀◀ or ▶▶ key.
		* Manual Threshold Level: 0-8 (Default: 0)	The value can be changed with the ◀◀ or ▶▶ key.
		* Pedestal Level: 0-8 (Default: 0)	The value can be changed with the ◀◀ or ▶▶ key.
PLAY	All channels assigned to have specific settings are canceled, and the specific settings are reset to their default values.	—	Settings of General Setting mode are not affected.
CLEAR	If the channel currently selected is assigned to have specific settings, that assignment is canceled. (If that channel is canceled, the number of remaining channels for which specific channel settings can be made increases by 1.)	—	Pressing the key resets the settings of Specific Channel Setting mode for that channel to the initial values. Settings of General Setting mode are not affected.
PAUSE	The specific-setting data for the currently selected channel are reset to their default values. (But the assignment of a channel having specific settings is not canceled.)	—	Pressing the key resets the settings of Specific Channel Setting mode for that channel to the initial values. Settings of General Setting mode are not affected (retained).
ESC	Exits AVIO setting for specific areas, clearing the OSD.	—	—

\*R: Refers to keys on the remote control unit supplied with this unit. The keys without "R" refer to the remote control unit for service.

- Settings made will not be reset to the default settings even if resetting to the factory-preset values is performed.
- Screen display when Specific Channel settings are made on 12 (maximum) channels: In such a case, if a channel which does not have specific settings is selected, the individual setting state for that channel is not displayed, as shown in the figure below, and the settings cannot be modified. In such a case, if you wish to make Specific Channel Settings for the currently selected channel, you must clear the Specific Channel Settings for one or more channels beforehand.

**[With 12 channels having specific settings,  
when the currently selected channel does not have specific settings]**

AVIO Specific Area Mode

Input : [ TUNER ]

Sync AGC : ON

Threshold : Manual Threshold Level

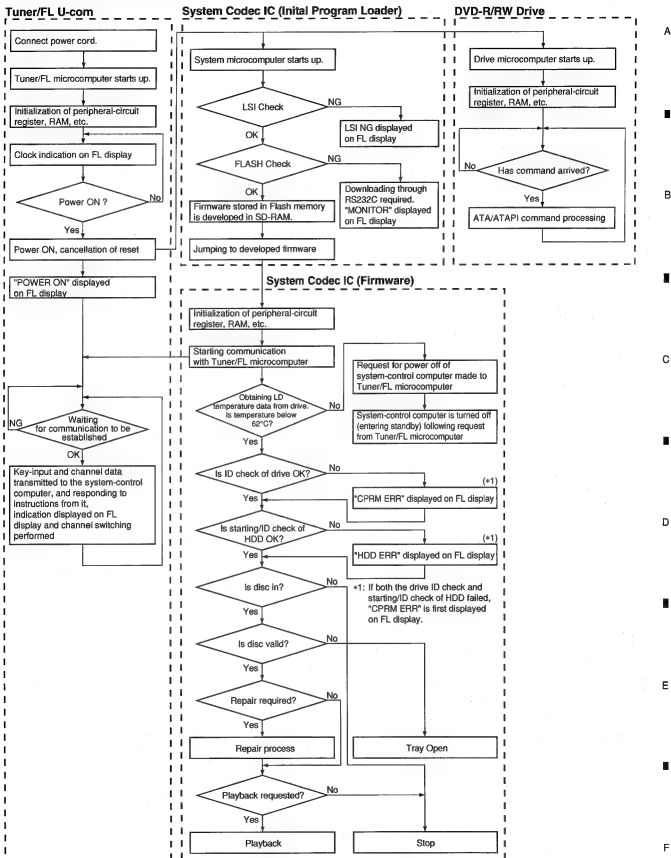

Threshold Level : 3

Individual setting state

Sorry !

You can store only 12 channels  
for Specific Area mode.

## 7.2.5 SETUP SEQUENCE

## 7.2.6 DISASSEMBLY

**Note :** When remove the HDD and diagnose it, order the ATAB Assy (VWV1968) and a flexible cable (40P) (VDA1977) using for connection of DRIVE Assy R6. And use it as cable extension.

### 1 Bonnet S, Tray Panel Assy

- ① Remove the bonnet by removing the eight screws.
- ② Press the  $\odot$  STANDBY/ON button to turn on the power.
- ③ Press the  $\blacktriangle$  button to open the tray.
- ④ Remove the tray panel assy.
- ⑤ Press the  $\blacktriangle$  button to close the tray.
- ⑥ Press the  $\odot$  STANDBY/ON button to turn off the power.

#### ● How to open the tray when the power cannot be on

When the player cannot eject disc tray due to power failure or any other reasons, open the jack door, and use a long thin pole and push the emergency eject hole under the tray panel to eject.

### 2 Front Panel Section

- ① Remove the two screws.
- ② Remove the four hooks.
- ③ Remove the front panel section.

### 3 HDD

- ① Disconnect the two connectors.
- ② Remove the two screws.
- ③ Remove the three screws.
- ④ Remove the aluminum tape from the HDD side.
- ⑤ Remove the HDD with HDD stay.

**4 DRIVE Assy R6**

- ① Remove the two screws.
- ② Remove the three screws.
- ③ Disconnect the connector.
- ④ Remove the DRIVE Assy R6.
- ⑤ Remove the two screws.

**5 MAIN Assy**

- ① Remove the four screws.
- ② Disconnect the flexible cable from DVJB Assy.
- ③ Stand the MAIN Assy.

**6 Diagnosis**

- ① Insert the insulation sheet between the MAIN Assy and chassis.
- ② Arrange the unit as shown in the photo below.

**Caution:** MAIN IC (IC1001) on the MAIN Assy generate heat to around 80 degrees.  
Be careful when works.

## 7 DRIVE Assy R6 (DVD-R/RW WRITER)

① Remove the four aluminium tape.

② Remove the four screws.

⑤ Remove the bonnet.

⑥ Remove the clamber holder by removing the four screws.

③ Remove the one screw.

④ Remove the front bezel by removing the four hooks.

⑦ Clean the pickup lens.

## 7.3 IC

• The information shown in the list is basic information and may not correspond exactly to that shown in the schematic diagrams.

### • List of IC

PD5947A8, RS5C372A, LC75342M, AK5381VT, PST3428U, PST3809U, NJM2880U1-33, M65672WG-C, UPD72852AGB-8EU, UPD72893AGD-LML, TDA9818TS, LA73026AV

## • Block Diagram

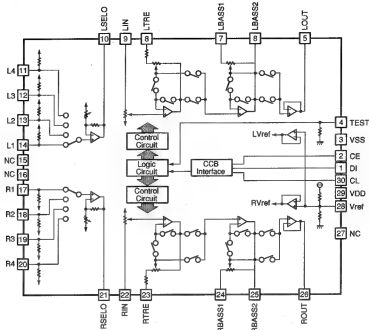

## • Pin Function

No.	Pin Name	I/O	Function
1	/INTRB	O	Interruption output B The output of 32.768kHz (in 32768Hz crystal use), cycled interrupt for CPU, or output alarm interrupt (ALARM_B). This pin output 32.768kHz when activated power from 0V. Nch open drain output.
2	SCL	I	Shift clock input Synchronize with this clock, and input and output data from a SDA terminal. Exceed VDD, and can input to 6V.
3	SDA	I/O	Serial input and output Synchronize with SCL, and input and output writing data or readout data. Exceed VDD, and can input to 6V. Nch open drain output in the output.
4	VSS	-	Ground pin
5	/INTRA	O	Interruption output A Cycled interrupt for CPU, or output alarm interruption (ALARM_A, ALARM_B). This pin becomes an OFF state when activated power from 0V. Nch open drain output.
6	OSCOUT	O	Oscillation circuit output
7	OSCIN	I	Oscillation circuit input
8	VDD	-	Positive supply input

## ● Block Diagram

## ● Pin Function

No.	Pin Name	Function	No.	Pin Name	Function
1	DI	Serial data input for control	16	NC	Not connected
2	CE	Chip enable pin Data are written in the internal latch by a timing of "H" → "L", and each analog switch works. Data transfer is enabled by "H" level.	17	R1	Input signal pin
3	VSS	Ground pin	18	R2	
4	TEST	Pin for electronic volume test Set to VSS electric potential.	19	R3	
5	LOUT	Volume and equalizer output pin	20	R4	
6	LBASS2	Capacitor and resistor connection pins for bus bandpass filter	21	RSELO	Input selector output pin
7	LBASS1	Capacitor connection pin for treble bandpass filter	22	RIN	Volume and equalizer input pin
8	LTRE		23	RTRE	Capacitor connection pin for treble bandpass filter
9	LIN	Volume and equalizer input pin	24	RBASS1	Capacitor and resistor connection pins for bus bandpass filter
10	LSELO	Input selector output pin	25	RBASS2	
11	L4	Input signal pins	26	ROUT	Volume and equalizer output pin
12	L3		27	NC	Not connected
13	L2		28	Vref	0.5XVDD voltage generation block
14	L1		29	VDD	Power supply pin
15	NC	Not connected	30	CL	Clock input pin for control

## ● Pin Function

### ● Cable Interface Pins

No.	Pin Name	I/O	Function
39	TpA0p	I/O	Port 0 twisted pair cable A positive phase I/O
38	TpA0n	I/O	Port 0 twisted pair cable A negative phase I/O
37	TpB0p	I/O	Port 0 twisted pair cable B positive phase I/O
36	TpB0n	I/O	Port 0 twisted pair cable B negative phase I/O
46	TpA1p	I/O	Port 1 twisted pair cable A positive phase I/O
45	TpA1n	I/O	Port 1 twisted pair cable A negative phase I/O
44	TpB1p	I/O	Port 1 twisted pair cable B positive phase I/O
43	TpB1n	I/O	Port 1 twisted pair cable B negative phase I/O
19	SUS/RES	I	Suspend/Resume function select 1 : Suspend/Resume on (IEEE1394a-2000 compliant) 0 : Suspend/Resume off (P1394a draft 1.3 compliant)
32	CPS	I	Cable power status Connect to the cable through a 390 kΩ resistor and to the GND through a 100 kΩ resistor. 0 : Cable power fall 1 : Cable power on

### ● Link Interface Pins

No.	Pin Name	I/O	Function
8	D0	I/O	Data input/output (bit 0)
9	D1	I/O	Data input/output (bit 1)
11	D2	I/O	Data input/output (bit 2)
12	D3	I/O	Data input/output (bit 3)
14	D4	I/O	Data input/output (bit 4)
15	D5	I/O	Data input/output (bit 5)
17	D6	I/O	Data input/output (bit 6)
18	D7	I/O	Data input/output (bit 7)
5	CTL0	I/O	Link interface control (bit 0)
6	CTL1	I/O	Link interface control (bit 1)
63	LREQ	I	Link request input
2	SCLK	O	Link control output clock LPS 1 : 49.152 MHz output LPS 0 : Clamp to 0 (The clock signal will be output within 25 μsec after change to "0")
59	LPS	I	Link power status input 0 : Link power off 1 : Link power on (PHY/Link direct connection)
58	LKON	O	Link-on signal output Link-on signal is 6.1444 MHz clock output.
50	DIRECT	I	PHY/Link isolation barrier control input 0 : Isolation barrier 1 : PHY/Link direct connection

### • Control Pins

No.	Pin Name	I/O	Function
26	PC0	I	Power class set input This pin status will be loaded to Pwr_class bit which allocated to PHY register 4H. IEEE1394a-2000 chapter [4.3.4.1]
27	PC1	I	
28	PC2	I	
30	CMC	I	Configuration manager capable setting This pin status will be loaded to Contender bit which allocated to PHY register 4H. 0 : Non contender 1 : Contender
55	RESETB	I	Power on reset input Connect to GND through a 0.1 $\mu$ F capacitor. 0 : Reset 1 : Normal
61	SPD/BDB	I FNSel = 0	Speed select (UPD72852GB) 0 : MAX, S200 1 : MAX, S400
		O FNSel = 1	BIAS Detected output (Logical Inverse) 0 : BIAS is coming from some port. 1 : BIAS is not coming from any port.

### • IC

No.	Pin Name	I/O	Function
29, 51	IC (AL)	—	Internally Connected (Low Clamped) Connected to GND.
3	IC (DL)	—	Internally Connected (Low Clamped) Connected to GND.

### • Power Supply Pins

No.	Pin Name	I/O	Function
25, 31, 40, 47, 54	AVDD	—	Analog power
24, 33, 35, 42, 49, 52, 53	AGND	—	Analog GND
4, 10, 20, 56, 60	DVDD	—	Digital VDD
1, 7, 13, 16, 21, 57, 64	DGND	—	Digital GND

### • Other Pins

No.	Pin Name	I/O	Function
41	TpBias0	O	Port 0 twisted pair output
48	TpBias1	O	Port 1 twisted pair output
34	Ri1	—	Resistor connection pin 1 for reference current generator Please connect to GND pin through the 9.1 k $\Omega$ resistor.
23	XI	—	Crystal oscillator connection XI
22	XO	—	Crystal oscillator connection XO
62	FNSel	I	Function Select 0 : #61 acts as SPD (UPD72852GB compliant) 1 : #61 acts as BDB

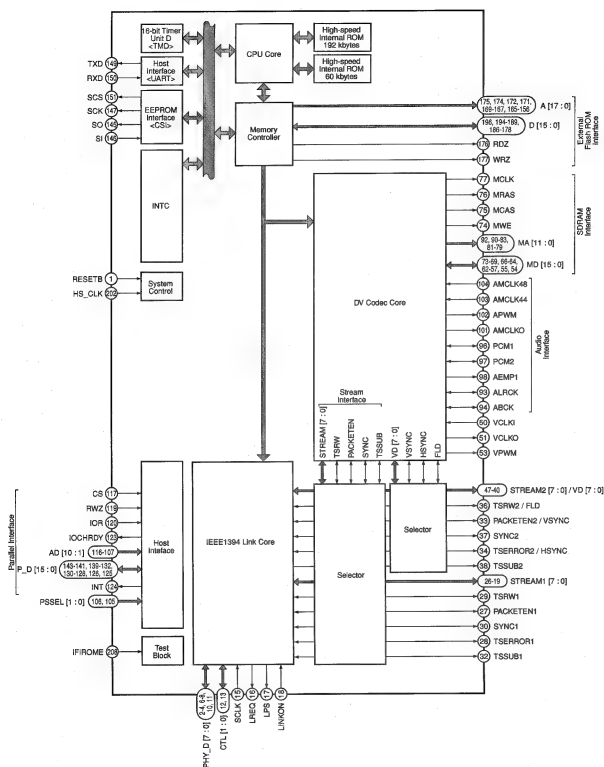

# ■ UPD72893AGD-LML (MAIN ASSY : IC5202)

## ● Pin Arrangement

# ● Block Diagram

## ● Pin Function

### (1) Link relation

No.	Pin Name	I/O	Function	Active
18	LINKON	I	Link-on signal input Clock input When LPS is active, input 0.	—
17	LPS	O	Link power status output Link power OFF : 0 Link power ON : 2.7 MHz pulse output (20 dividing of host clock 54 MHz)	—
16	LREQ	O	Link request output	—
15	SCLK	I	Clock input for Link control LPS is active : 49.152 MHz input LPS = 0 : 0 : fixed	—
12, 13	CTL [1 : 0]	I/O	PHY/Link control signal input/output	—
2-4, 6-8, 10, 11	PHY_D [7 : 0]	I/O	Data input/output between PHY-Link	—
26-19	STREAM1 [7 : 0]	I/O	ISO data bus of stream interface 1	—
27	PACKETEN1	I/O	Packet enable signal input/output of stream interface 1	H/L
28	TSERROR1	I/O	Packet error signal input/output of stream interface 1	H/L
29	TSRW1	I/O	Data read/write enable signal input/output of stream interface 1	—
30	SYNC1	I/O	Frame synchronous signal input/output of stream interface 1	H/L
32	TSSUB1	I/O	Not used Connect to VDD or GND through a resistor.	H/L
47-40	STREAM2 [7 : 0]	I/O	ISO data bus of stream interface 2	—
33	PACKETEN2	I/O	Packet enable signal input/output of stream interface 2	H/L
34	TSERROR2	I/O	Packet error signal input/output of stream interface 2	H/L
36	TSRW2	I/O	Data read/write enable signal input/output of stream interface 2	—
37	SYNC2	I/O	Frame synchronous signal input/output of stream interface 2	H/L
38	TSSUB2	O	Not used Set to open.	—

### (2) Video interface pins

No.	Pin Name	I/O	Function	Active
50	VCLKI	I	Video clock input (27 MHz)	—
51	VCLKO	O	Video clock output (27 MHz)	—
47-40	VD [7 : 0]	I/O	Video data signal	—
33	VSYNC	I/O	Video vertical sync. signal	L
34	HSYNC	I/O	Video horizontal sync. signal	L
36	FLD	I/O	Field index signal	—
53	VPWM	O	PWM signal for video PLL	—

### (3) Audio interface pins

No.	Pin Name	I/O	Function	Active
104	AMCLK48	I	Audio master clock input for sampling frequency 48 kHz	-
103	AMCLK44	I	Audio master clock input for sampling frequency 44 kHz	-
101	AMCLKO	O	Audio master clock output	-
96	PCM1	I/O	Audio PCM serial data At 2ch : System 1 (data of audio block 1) At 4ch : System 1 The above is default setting value. Input/output data of PCM 1 and PCM 2 is replaced by Channel swap setting of an AUDIO_FUNC register.	-
97	PCM2	I/O	Audio PCM serial data At 2ch : Mute At 4ch : System 2 (data of audio block 2) The above is default setting value. Input/output data of PCM 1 and PCM 2 is replaced by Channel swap setting of an AUDIO_FUNC register. Note: Cannot use it in DV decode.	-
98	AEMP1	O	PCM1 emphasis ON/OFF in PCM 1 output	H
93	ALRCK	I/O	Audio LR clock L ch : High R ch : Low	-
94	ABCK	I/O	Audio bit clock	-
49, 48	AFS [2 : 1]	O	Audio sampling frequency AFS2 AFS1 44.1 kHz 0 1 48 kHz 0 0 32 kHz 1 0	-
102	APWM	O	PWM signal for audio PLL	-

### (4) SDRAM interface pins

No.	Pin Name	I/O	Function	Active
77	MCLK	O	CLK pin connection of SDRAM	-
76	MRAS	O	RAS pin connection of SDRAM	-
75	MCAS	O	CAS pin connection of SDRAM	-
74	MWE	O	WE pin connection of SDRAM	-
92, 90-93, 81-79	MA [ 11 : 0 ]	O	Address pin connection of SDRAM	-
73-69, 66-64, 62-57, 55, 54	MD [ 15 : 0 ]	I/O	Data pin connection of SDRAM Note: Process of pull-up or pull down is necessary. So connect it to SDRAM directly.	-

## (5) Host interface pins

### (a) Parallel interface pins

No.	Pin Name	I/O	Function	Active
117	CS	I	Chip select input of parallel interface	L
119	RWZ	I	Read and write control input of parallel interface ISA type bus, SH-1 bus: Write strobe 68000 bus: Read/write selection signal	L
120	IOR	I	IO read control input of parallel interface ISA type bus, SH-1 bus: Read strobe 68000 bus: Data strobe (DS)	L
123	IOCHRDY	O	Ready output of parallel interface	L
116-107	AD [10:1]	I	Address input of parallel interface	-
143-141, 139-132, 130-128, 126, 125	P_D [15:0]	I/O	Data input/output of parallel interface	-

### (b) Serial interface pins

No.	Pin Name	I/O	Function	Active
149	TXD	I/O	Serial transmission data output of unsynchronous serial interface (UART)	-
150	RXD	I/O	Serial transmission data input of unsynchronous serial interface (UART)	-

### (c) Others

No.	Pin Name	I/O	Function	Active
124	INT	O	Interrupt output to the outside	H
106, 105	PSSEL [1:0]	I	Parallel/serial interface selection Input signal to select the outside interface which of parallel interface or serial interface. PSSEL [1:0] Select 00 Serial interface (UART) 01 Parallel interface (ISA type bus) 10 Parallel interface (68000 bus) 11 Parallel interface (SH-1 bus)	-

## (6) External ROM connection pins

### (a) Flash ROM interface pins

No.	Pin Name	I/O	Function	Active
196, 194-189, 186-178	D [15 : 0]	I/O	External ROM data bus Data bus in the external ROM access. Process of pull-up or pull down is necessary.	—
175, 174, 172, 171, 169-167, 165-156	A [17 : 1]	O	External ROM address bus Address bus in the external ROM access. Can addressing the 256k byte space.	—
176	RDZ	O	ROM read Strobe signal which shows a read cycle for external ROM. It becomes the inactive in the idle state.	L
177	WRZ	O	ROM write Strobe signal which shows a write cycle for external ROM.	L

### (b) EEPROM interface pins

No.	Pin Name	I/O	Function	Active
145	SO	I/O	Serial transmit data output of clock-synchronous system serial interface (CSI)	—
146	SI	I/O	Serial receive data input of clock-synchronous system serial interface (CSI)	—
147	SCK	I/O	Clock output of clock-synchronous system serial interface (CSI)	—
151	SCS	I/O	Chip select output of clock-synchronous system serial interface (CSI)	—

## (7) Clock and reset pins

No.	Pin Name	I/O	Function	Active
1	RESETB	I	Reset RESETB input is asynchronous input. When a signal of fixed low-level width is input without relation to an operation clock, take precedence of all operation, and reset the system. Note: RESETB is low-active.	L
202	HS_CLK	I	Host clock Clock input pin which is supplied to CPU core and built-in peripheral I/O. Please input 27 MHz clock. Perform 2 multiply with internal PLL by 27 MHz clock, 54 MHz clock is supplied to CPU core and internal peripheral I/O.	—

## (8) Power supply and ground pins

No.	Pin Name	I/O	Function	Active
5, 31, 52, 63, 78, 95, 127, 140, 166, 187	3.3VDD	–	3.3V power supply 3.3V positive power supply pins. Power supply for 3.3V interface I/O.	–
14, 67, 118, 170	2.5VDD	–	2.5V power supply 2.5V positive power supply pins. Power supply for internal each block.	–
39, 91, 144, 195	2.5GND	–	Ground pins Connect all GND pins to the common ground.	–
9, 35, 56, 68, 82, 99, 131, 148, 173, 188	3.3GND			–
199	PLLA VDD	–	Analog power supply for multiply circuit Analog positive power supply pin for PLL. Supply 2.5V.	–
200	PLLAGND	–	Analog ground for multiply circuit Analog ground for PLL	–
198	PLLDVDD	–	Digital power supply for multiply circuit Digital positive power supply pin for PLL. Supply 2.5V.	–
201	PLLDGND	–	Digital ground for multiply circuit Digital ground for PLL	–
121	IC (H)	–	Internally connected pin Connect to VDD directly.	–
197, 203, 205-207	IC (L)	–	Internally connected pin Connect to ground directly.	–
152, 154, 204	IC (PL)	–	Internally connected pin Connect to ground through a resistor.	–
100, 122	IC (O)	–	Internally connected pin Set to open.	–

## (9) Others

No.	Pin Name	I/O	Function	Active
153	DV_INT	I/O	Interrupt pin to the outside for the DV status read out.	H
155	BR_MON	I/O	Shows the bus reset occurred. There is some delay after real bus reset occurred because of set by the built-in firmware.	H
208	IFIROME	I	ROM operation selection input Set to 1 normally.	–

- VIF/SIF IC

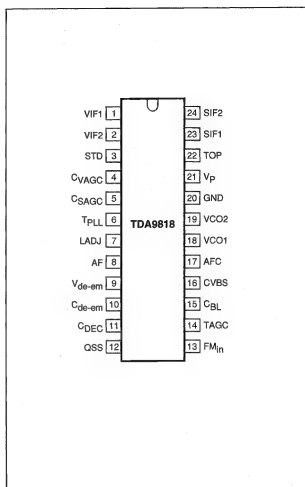

- VIF/SIF IC

## ● PIN FUNCTION

SYMBOL	PIN	DESCRIPTION
VIF1	1	VIF differential input signal voltage 1
VIF2	2	VIF differential input signal voltage 2
STD	3	standards selection switch; note 1
C <sub>VAGC</sub>	4	VIF AGC capacitor
C <sub>SAGC</sub>	5	SIF AGC capacitor
T <sub>PLL</sub>	6	PLL filter
LADJ	7	L/L accent switch and adjust
AF	8	audio output
V <sub>de-em</sub>	9	de-emphasis output
C <sub>de-em</sub>	10	de-emphasis input
C <sub>DEC</sub>	11	decoupling capacitor
QSS	12	single reference QSS/intercarrier output voltage
FM <sub>in</sub>	13	sound intercarrier input voltage
TAGC	14	tuner AGC output
C <sub>BL</sub>	15	black level detector
CVBS	16	composite video output voltage
AFC	17	AFC output
VCO1	18	VCO1 resonance circuit
VCO2	19	VCO2 resonance circuit
GND	20	ground
V <sub>P</sub>	21	supply voltage
TOP	22	tuner AGC takeover point adjust
SIF1	23	SIF differential input signal voltage 1
SIF2	24	SIF differential input signal voltage 2

- **Block Diagram**

## 7.4 OUTLINE OF THE PRODUCT

### Main newly developed technologies

#### 1. Pickup

The pickup supports quadruple-speed recording for the DVD-R/RW.

A liquid-crystal tilt servo system is adopted for the pickup.

#### 2. Recording-signal-processing LSI

- UPD3320GC (DRIVE Assy: IC101)

The recording-signal-processing module of conventional models consists of two chips, but this has been integrated into a single newly developed recording-signal-processing LSI, enabling stable performance and cost reduction.

#### 3. AV-signal-processing LSI

- M65672WG-B (MAIN Assy: IC1001)

The AV-signal-processing module of conventional models consists

of eleven chips, but this has been integrated into a single newly developed AV-signal-processing LSI, enabling large-scale cost reduction while maintaining the conventional functions. In the new LSI, all the basic functions necessary for a DVD recorder have been integrated. Like conventional models, this model is designed to support multitasking. The main functions are as follows:

- 3-D Y/C separation
- Video decoding
- Frame TBC
- MPEG video encoding
- Dolby Digital Consumer Encoding
- ATA/ATAPI I/F (2 ch)
- Main CPU (32-bit RISC, 54 MHz)
- Graphics engine (OSD, scaling, mixing)
- MPEG video decoding
- Audio decoding (AC-3, MPEG)
- Video encoding
- Progressive conversion
- Audio I/F
- 3-D DNR for playback

#### 4. DV-signal-processing LSI

The DV-signal-processing LSI consists of the following two chips:

- UPD72862AGB-SEU (MAIN Assy: IC5101)

A 400-Mbps two-port PHY LSI in compliance with the IEEE1394a-2000 standards

- UPD72893AGD-LML (MAIN Assy: IC5202)

An IEEE1394 link controller LSI having DV (digital video) encoding/decoding functions. Encoding/decoding of digital video signals in compliance with the SD specifications (NTSC/PAL) of the DV standard is supported. The 32-bit RISC CPU is built in for controlling the IEEE1394 bus and sending/receiving AV/C commands.

Fig.1 MAIN Assy

## System configuration

In each signal-processing LSI of the main function blocks, various processes have been integrated into one chip, which enables simpler system configuration. With the AV-signal-processing LSI at the center, video inputs/outputs, audio inputs/outputs, DV inputs/outputs, writer, HDD, and various memory cells are connected to it.

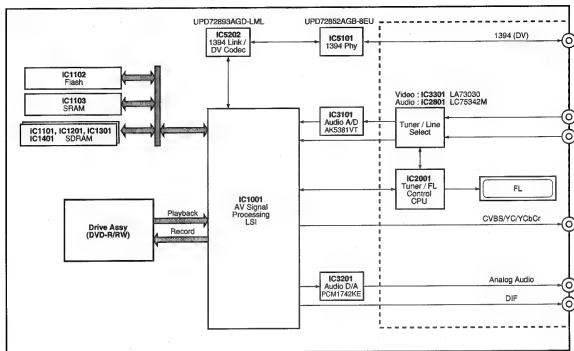

Fig2. System configuration

## ■ New functions and specifications

In this model, the following new functions and specifications have been included in addition to those of conventional models:

### 1. Improved multitasking functions

As both the HDD and DVD drive are recorded in this model, like conventional models, the unit is designed to support various multitasking. Furthermore, this model supports DVD multitasking (only in VR mode), which was impossible with conventional models.

#### ⑥ Pursuit playback

Playback of the title being recorded by the DVD drive in VR mode or the HDD is supported.

#### ⑤ Simultaneous recording/playback 1

Playback of a title other than that being recorded by the DVD drive in VR mode or the HDD is also supported.

#### ⑤ Simultaneous recording/playback 2

DVD playback during HDD recording is supported.

#### ⑤ Simultaneous recording/playback 3

HDD playback during DVD recording is supported.

#### ⑥ Recording during high-speed dubbing

HDD recording during high-speed dubbing from the HDD to a DVD is supported.

#### ④ Playback during high-speed dubbing

Playback of an HDD title during high-speed dubbing from the HDD to a DVD is supported.

### 2. Improved dubbing functions

High-speed dubbing and normal-speed dubbing are supported, as with conventional models. A one-touch dubbing function that enables automatic selection between these dubbing functions is also provided. In this model, high-speed dubbing from a DVD (in VR mode) to the HDD is also an added capability.

### 3. Disc backup

The function of creating a backup disc for a disc recorded in Video mode is added. The data of the original DVD are transferred to the HDD, then retransferred to the DVD drive, and because no reencoding is required during data transmission between the drives, a backup disc with no degradation of video and audio signals can be created.

### 4. Advanced disc NAVI

In the conventional disc NAVI function, recorded titles are displayed with still pictures as a list. In the advanced disc NAVI function, the title selected with the cursor is displayed as an animated picture with sound.

### 5. Improved Still Picture menu in Video mode

The disc NAVI function, which enables displaying a list of recorded titles with still pictures, is enabled in Video mode with this model. Selection from among nine title menus is also supported.

### 6. Adoption of MPEG2 SIF

In MN1-6 modes, MPEG2 SIF has been adopted, instead of the MPEG1 SIF of conventional models. This enables higher-quality recording for longer hours.

### 7. Improved editing functions

For DVD, the original/play-list editing in DVD-VR mode available with conventional models is provided.

For HDD editing, play-list-editing functions almost the same as for the DVD-VR, such as title combination, separation, and partial erasure, are enabled for the HDD with this model. With conventional models, these edit functions are available only for the dubbing list. The automatic-chapter-mark-insertion function in response to a change in audio type (stereo, monaural, bilingual) makes commercial-cutting editing easier.

### 8. Various-format playback

Playback of WMA, MP3, and JPEG formats is supported.

### 9. Other functions and specifications

The following main functions and specifications adopted with conventional models are also provided with this model:

- 192-kHz, 24-bit DAC
- 48-kHz, 20-bit ADC
- Digital 3-D Y/C separation circuit
- Digital frame TBC
- 3-D DNR
- DV (iLink) input/output (DVR-610H)
- Built-in BS tuner (DVR-510H/515H/610H)
- Playback with commercials skipped
- CD/video-CD playback
- Picture creation
- Recording with 3/4-D1 and 2/3-D1 resolutions
- Recording mode with 32-step MNs
- LPCM recording
- High-resolution GUI
- Progressive output
- SRS TruSurround

## 7.5 DISC/CONTENT FORMAT PLAYBACK COMPATIBILITY

### Disc / content format playback compatibility

#### General disc compatibility

This recorder was designed and engineered to be compatible with software bearing one or more of the following logos:

Also compatible with KODAK Picture CD

 is a trademark of Fuji Photo Film Co. Ltd.

This recorder supports the IEC's Super VCD standard. Compared to the Video CD standard, Super VCD offers superior picture quality, and allows two soundtracks to be recorded. Super VCD also supports the widescreen size.

Other formats, including but not limited to the following, are not playable in this recorder:

**DVD-Audio / SACD / DVD-RAM  
DVD-ROM / CD-ROM\***

\* Except those that contain WMA, MP3 or JPEG. See also Compressed audio compatibility and JPEG file compatibility below.

DVD-R/RW and CD-R/RW discs recorded using a DVD recorder, CD recorder or personal computer may not be playable in this recorder. This may be caused by a number of possibilities, including but not limited to: the type of disc used; the type of recording; damage, dirt or condensation on either the disc or the pick-up lens. See below for notes about particular software and formats.

#### DVD-R/RW compatibility

This recorder will play and record DVD-R/RW discs that use DVD-Video format (Video mode), and DVD-RW discs that use the Video Recording (VR) format. It is compatible with DVD-RW Ver. 1.1 and Ver. 1.1 / 2x, and DVD-R Ver. 2.0 and Ver. 2.0 / 4x.

#### CD-R/RW compatibility

This recorder will play CD-R and CD-RW discs recorded in CD Audio or Video CD format, or as a CD-ROM containing MP3, WMA or JPEG files. However, any other content may cause the disc not to play, or create noise/distortion in the output.

This recorder cannot record CD-R or CD-RW discs.

#### PC-created disc compatibility

If you record a disc using a personal computer, even if it is recorded in a "compatible format" as listed above, there will be cases in which the disc may not be playable in this recorder due to the setting of the application software used to create the disc. In these particular instances, check with the software publisher for more detailed information.

Check the DVD-R/RW or CD-R/RW software disc boxes for additional compatibility information.

#### WMA (Windows Media Audio) compatibility

The Windows Media logo printed on the box indicates that this recorder can playback WMA data.

WMA is short for Windows Media Audio and refers to an audio compression technology developed by Microsoft Corporation. WMA data can be encoded by using Windows Media Player version 9 (or less) or Windows Media Player for Windows XP.

Windows Media, and the Windows logo are trademarks, or registered trademarks of Microsoft Corporation in the United States and/or other countries.

#### Compressed audio compatibility

This recorder will play CD-ROM, CD-R, and CD-RW discs containing files saved in the MPEG-1 Audio Layer 3 (MP3) or Windows Media Audio (WMA) format with a sampling rate of 44.1 or 48kHz. Incompatible files will not play and the message **Cannot play this file format** will be displayed (**CANIT PLAY** in the front panel display).

Fixed bit-rate MP3 files are recommended. Variable bit-rate (VBR) MP3 files are playable, but playing time may not be shown correctly.

This recorder is compatible with 44.1 and 48 kHz WMA files encoded with Windows Media Codec 8. Files encoded using Windows Media Codec 9 may be playable, but some parts of the specification are not supported (specifically, Pro, Lossless, Voice and VBR WMA files).

DRM (Digital Rights Management) copy protection is a technology designed to prevent unauthorized copying by restricting playback, etc. of material on devices other than the PC (or other WMA recording equipment) used to record it. For detailed information, please see the instruction manuals or help files that came with your PC (or other WMA recording equipment) and/or software.

WMA files encoded with DRM (Digital Rights Management) copy protection will not play and the message **Cannot play this file format** will be displayed (**CANIT PLAY** in the front panel display).

The CD-ROM used to compile your WMA/MP3 files must be ISO 9660 Level 1 or 2 compliant. CD physical format: Mode1, Mode2 XA Form1. Romeo and Joliet file systems are both compatible with this recorder.

Use CD-R or CD-RW media for recording your files. The disc must be finalized (i.e. the session must be closed) in order to play in this recorder.

This recorder only plays tracks that are named with the file extension .MP3 or .WMA (upper or lower-case).

When naming MP3 and WMA files, add the corresponding file name extension (.mp3 or .wma). Files are played according to the file extension. To prevent noise and malfunctions, do not use these extensions for other kinds of files.

This recorder can recognize up to 99 folders and 999 files (WMA/MP3). If a disc exceeds these limits, only files and folders up to these limits will be playable. Files and folders are read/displayed in alphabetical order. Note that if the file structure is very complex, you may not be able to read/play all files on the disc.

Folder, track and file names (excluding the file extension) are displayed.

There are many different recording bit-rates available to encode MP3 files. This recorder has been designed to be compatible with all of them. Audio encoded at 128Kbps should sound close to regular CD Audio quality. This recorder will play lower bit-rate files, but please note that the sound quality becomes noticeably worse at lower bit-rates.

## JPEG file compatibility

This recorder is compatible with Fujicolor CD and Kodak Picture CD formats, as well as CD-R/RW/ROM discs containing JPEG files.

Baseline JPEG and EXIF 2.2<sup>1</sup> still image files are supported (horizontal resolution from 160x5120 pixels; vertical resolution between 120x3840 pixels).

<sup>1</sup> File format used by digital still cameras

The CD-ROM used to compile your JPEG files must be ISO 9660 Level 1 or 2 compliant. CD physical format: Mode1, Mode2 XA Form1. Romeo and Joliet file systems are both compatible with this recorder.

This recorder only displays files that are named with the file extension .jpg, .jpeg, .jif, or .jif (upper or lower-case).

The recorder can load up to 99 folders and 999 files at one time. If there are more files/folders than this on the disc then more can be reloaded.

## 7.6 CAUTIONS ON HANDLING THE HDD

### (1) Cautions on Handling the HDD

- The HDD is very sensitive to shocks and vibrations. Care must be taken especially during operation (when the power is on).
- The HDD is very sensitive to electrostatic charges.
- Rapid change in temperature or humidity may cause deterioration of the HDD.

Note: After receiving damage caused by any above-mentioned factors, the HDD may operate normally for dozens or some hundreds of hours but then suddenly crash. If you are certain you have damaged a new repair part (HDD) while making repairs, do not use the part.

The HDD is about 10 times as sensitive to shock during operation than during nonoperation.

Reference: Main specifications on damage to the HDD

	During operation	During nonoperation
Shock G (acceleration)	<approx. 20 G	<approx. 200 G
Temperature change	< 20°C/hour	
Moisture change	< 20%/hour	

Reference: Estimate value of falling distance vs. shock (G) when the HDD is dropped without protection

Falling distance	Landing surface	Granite surface	Concrete floor	Synthetic-resin-coated table	Antistatic sponge
0.5 inch / 12.7 mm		387	217	200	26
1.0 inch / 25.4 mm		595	457	310	37
2.0 inch / 50.8 mm		1133	600	680	70
4.0 inch / 101.6 mm		1795	1040	1050	267

### (2) Cautions on handling the product on which the HDD is mounted or the HDD as a repair part, and examples of dangerous handling

#### [Cautions on handling the product on which the HDD is mounted]

- While the unit is turned on, the HDD is always in operation. Be sure NOT to impart shock to the unit.

#### • Examples of dangerous handling: while the power is on

- Bumping on the bonnet
- Dropping an object, such as a small screwdriver or remote control unit, onto the bonnet, or bumping an object against the cabinet
- Moving the unit by dragging
- Stacking another product on the unit

Note: Be sure NOT to impart shock, such as bumping or hitting a screwdriver against the HDD, during diagnosis with the bonnet open.

#### • Examples of dangerous handling: while the power is off

- Imparting strong shock, although the HDD is more resistant to shock when the power is off
  - Dropping the unit from a height of several centimeters, or after lifting one side of the unit up, then letting the unit drop.
  - Do NOT move the unit immediately after the power is turned off. Wait at least 30 seconds after the indication on the FL display changed from POWER OFF to the clock indication before moving the unit.
- If the AC power cord is accidentally disconnected before turning the unit off, wait at least for one minute before moving it. In this case, damage to the HDD caused by sudden shutoff may be small, because the emergency relief mechanism is activated. However, if sudden shutoff occurs during recording or playback, recorded data may be damaged. Be sure to check operations.

#### [Cautions on handling the HDD as a repair part]

1. Handle the HDD in a safe environment:

- Handle the HDD over an antistatic pad that can also absorb shock.
- Wear wrist bands to prevent electrostatic charges generated in your body from affecting the HDD.

2. The following must be observed when handling the HDD:

- Handle one HDD at a time. Do NOT hold several HDDs at the same time.
- Grip the HDD on both sides so that you do not touch its terminals or circuit boards.
- Do NOT stack one HDD onto another HDD (even if the HDDs are protected in antistatic bags).
- Do NOT bump the HDDs against one another.
- Do NOT bump any tool, such as a screwdriver, or other hard object against the HDD.
- When a repair part (HDD) is transported and there is a large temperature difference between outdoors and indoors, to the indoor, leave it in its package for about a half day to gradually cool or warm the HDD to room temperature before unpacking it.

#### [Notes on packing for shipment]

- When returning a defective HDD for analysis, handle with care as if it were a good product. Otherwise, the results of analysis may not be correct.
- When packing, use the antistatic bag and packing materials in which the repair part for service was delivered. Attach a copy of the slip for service or a memo stating symptoms in as much detail as possible.

# ■ Outline and part No. of the HDDs

\*Pioneer's part No. is not stamped.

Model Name	Capacity	Maxtor		Western Digital		Seagate	
		Pioneer's Part No. (for service)	Manufacturer's Part No.	Pioneer's Part No. (for service)	Manufacturer's Part No.	Pioneer's Part No. (for service)	Manufacturer's Part No.
DVR-510H-S	80GB	VXF1010	4R080L0-	VXF1030	WD800LB-	VXF1036	ST380010ACE-

- When replacing the HDD, carefully check the capacity and manufacturer's part No. on the part label to avoid replacing with a similar but inappropriate product. You can also check the model No. of the mounted HDD on the Service mode screen.
- Do NOT use repair parts, such as commercially available HDDs, other than those designated above, as their functions, performance or reliability cannot be guaranteed.

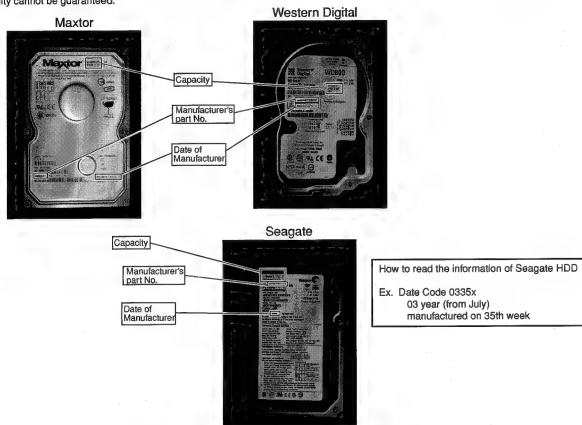

Fig.1 Location of the data on capacity and part No. of the HDD

# ■ Confirmation of the jumper pin location of the HDD

## 7.7 CLEANING

Before shipping out the product, be sure to clean the following positions by using the prescribed cleaning tools:

Position to be cleaned	Cleaning tools
Pickup lenses	Cleaning liquid : GEM1004 Cleaning paper : GED-008

Position to be cleaned	Cleaning tools
Fans	Cleaning paper : GED-008

## 8. PANEL FACILITIES

## 8.1 FRONT SECTION

### Front panel

- 1  **STANDBY/ON**

Press to switch the recorder on/into standby.

- ## 2 HDD/DVD

Press to switch between hard disk drive (HDD) and DVD for recording and playback.

- 3 DVD disc tray

- 4 ▲ OPEN/CLOSE**

Press to open/close the disc tray.

- 5 ■ STOP

Press to stop playback.

- 6 || PAUSE

Press to pause/restart playback or recording.

- 7 ► PLAY

Press to start or restart playback.

- ## 8 FUNCTION

Press repeatedly to set the function of the **SMART JOG** dial. The function is shown in the display.

- ## 9 SMART JOG dial

- 10 ☐ STOP REC

Press to stop recording.

- 11 ● REC

Press to start recording.

- ## 12 Front panel inputs

Pull the cover down where indicated to access the front panel input jacks. Especially convenient for connecting camcorders and other portable equipment.

- ### 13 HDD indicator

Lights when the HDD is selected for playback/recording.

- #### 14 Front panel display

- ### 15 IR remote sensor

- 16 DV IN/OUT jack**

Digital input/output jack for use with a DV camcorder.

## 8.2 DISPLAY

### Display

#### 1 ← / →

Arrows indicate the copy direction between the HDD (HDD) and DVD (DVD).

#### 2 ► PLAY / ● REC indicators

Lights during playback / recording; blinks when playback / recording is paused.

#### 3 HDD ◀ ▶ DVD

The '◀' and '▶' indicators light to indicate that the HDD or DVD is selected for recording/playback.

#### 4 PL

Lights when a VR mode disc is loaded and the recorder is in Play List mode.

#### 5 23

Shows the remote control mode (if nothing is displayed, the remote control mode is 1).

#### 6 REM

Lights when the character display is showing the remaining available recording time.

#### 7 V

Lights when an unfinalized Video mode disc is loaded.

#### 8 R / RW

Indicates the type of recordable DVD loaded: DVD-R or DVD-RW.

#### 9 ⏻

Lights when a timer recording has been set. (Indicator blinks if the timer has been set to DVD but there isn't a recordable disc loaded, or the timer has been set to HDD but the HDD is not recordable.)

#### AUTO

Lights when Auto Start Recording has been set, and during Auto Start Recording.

#### 10 Recording quality indicators

##### FINE

Lights when the recording mode is set to FINE (best quality).

##### SP

Lights when the recording mode is set to SP (standard play).

##### LP

Lights when the recording mode is set to LP (long play).

##### EP

Lights when the recording mode is set to EP (extended play).

##### MN

Lights when the recording mode is set to MN (manual recording level) mode.

#### 11 Character display

#### 12 [B] [L]

Indicates which channels of a bilingual broadcast are recorded.

#### 13 VPS / PDC

Lights when receiving a VPS/PDC broadcast during a VPS/PDC-enabled timer recording.

#### 14 NTSC

Lights when playing NTSC format video.

#### 15 OVER

Lights when the analog audio input level is too high.

## 8.3 REAR PART

### Rear panel connections

#### 1 ANTENNA IN/OUT

Connect your TV antenna to the **ANTENNA IN** jack. The signal is passed through to the **ANTENNA OUT** jack for connection to your TV.

#### 2 AV2/(INPUT 1/DECODE) AV connector

Audio/video input SCART-type connector for connecting to a VCR, or other equipment with a SCART connector. The input accepts video and S-video.

#### 3 AV1/(RGB)-TV AV connector

Audio/video output SCART-type connector for connecting to a TV or other equipment with a SCART connector. The video output is switchable between video, S-video and RGB.

#### 4 DIGITAL OUT OPTICAL

For connecting to an AV receiver, Dolby Digital/DTS/MPES decoder or other equipment with optical digital input.

#### 5 CONTROL IN

Use to control this recorder from the remote sensor of another Pioneer component with a **CONTROL OUT** terminal and bearing the Pioneer  mark. Connect the **CONTROL OUT** of the other component to the **CONTROL IN** of this recorder using a mini-plug cord.

#### 6 AC IN - Power inlet

#### 7 INPUT 3/AUTO START REC jacks

Audio/video inputs (stereo analog audio; video and S-video) that you can use to connect to a satellite receiver, TV, VCR or other source component for recording.

#### 8 OUTPUT jacks

Audio/video outputs (stereo analog audio; video and S-video) that you can use to connect to a TV, monitor, AV receiver or other equipment.

### Front panel connections

On the left side of the front panel a flip-down cover hides a second audio/video input, consisting of a video and S-video jack, and stereo analog audio jacks. (You can also connect a mono source using just the **L(MONO)** jack.)

On the right side is the DV input/output i.LINK connector. This is for connection to a DV camcorder.

## 8.4 REMOTE CONTROL

### Remote control

#### 1 ONE TOUCH COPY

Press to start One Touch Copy of the currently playing title to DVD or the HDD.

#### 2 Remote control indicator

Lights when setting up the remote control for use with a TV and when setting the remote control mode.

#### 3 STANDBY/ON

Press to switch the recorder on/into standby.

#### 4 OPEN/CLOSE

Press to open/close the disc tray.

#### 5 HDD

Press to select the hard disk (HDD) for recording or playback.

#### 6 DVD

Press to select the DVD for recording or playback.

### 7 DVD playback functions

#### AUDIO

Changes the audio language or channel. (When the recorder is stopped, press to change the tuner audio.)

#### SUBTITLE

Displays/changes the subtitles included in multilingual DVD-Video discs.

#### ANGLE

Switches camera angles on discs with multi-angle scenes.

### 8 PLAY MODE

Press to display the Play Mode menu (for features such as search, repeat and program play).

### 9 TV/DVD

Press to switch between 'TV mode', in which you get the picture and sound from the TV's tuner, and 'DVD mode', in which you get picture and sound from the recorder's tuner (or an external input).

### 10 ALPHANUMERIC buttons and CLEAR

Use the number buttons for track/chapter/title selection; channel selection, and so on. The same buttons can also be used to enter names for titles, discs and so on.

Use **CLEAR** to clear an entry and start again.

### 11 INPUT SELECT

Press to change the input to use for recording.

### 12 CHANNEL +/-

Press to change the channel of the built-in TV tuner.

### 13 SHOWVIEW

Press, then use the number buttons to enter a ShowView programming number for timer recording.

### 14 DISC NAVIGATOR / TOP MENU

Press to display the Disc Navigator screen, or the top menu if a DVD-Video disc is loaded.

### 15 PLAY LIST / MENU

Press to switch between Original and Play List content on VR mode discs, or display the disc menu if a DVD-Video disc is loaded.

### 16 (cursor buttons) and ENTER

Used to navigate all on-screen displays. Press **ENTER** to select the currently highlighted option.

### 17 HOME MENU

Press to display the Home Menu, from which you can navigate all the functions of the recorder.

### 18 RETURN

Press to go back one level in the on-screen menu or display.

## 19 Playback controls

### ◀◀ REV SCAN / FWD SCAN ▶▶

Press to start reverse or forward scanning. Press again to change the speed.

### ▶ PLAY

Press to start playback.

### ⏏ PAUSE

Press to pause playback or recording.

### ■ STOP

Press to stop playback.

### CM SKIP

Press to skip 30 seconds forward on the disc (about the length of a typical TV commercial); press repeatedly to skip up to 4 minutes.

### ⏮ PREV / NEXT ⏭

Press to skip to the previous or next title/chapter/track/folder; or to display the previous or next menu page.

### ◀|| STEP/SLOW ||▶

During playback, press to start slow-motion playback; while paused, press to show the previous or next video frame.

## 20 Recording controls

### ● REC

Press to start recording. Press repeatedly to set the recording time in blocks of 30 mins.

### □ STOP REC

Press to stop recording.

### REC MODE

Press repeatedly to change the recording mode (picture quality).

### TIMER REC

Press to set a timer recording from the standard Timer Recording screen.

### EASY TIMER

Press to set a timer recording from the Easy Timer screen.

## 21 DISC HISTORY

Press to display summary information (disc name, recording time left, etc.) from the last 30 recordable discs loaded.

### NAVI MARK

Press to select a thumbnail picture for the current title for use in the Disc Navigator screen.

### CHP MARK

Press to insert a chapter marker when playing/recording a VR mode DVD-RW disc or the HDD.

## 22 DISPLAY

Displays/changes the on-screen information displays.

## 23 TV CONTROL

After setting up, use these controls to control your TV.

## 24 TV DIRECT REC

Press to start recording whatever channel your TV is set to.
